IRAQI WEAPONS STAND-OFF WASHINGTON THREATENS MILITARY STRIKES WITHOUT WARNING AMID SCEPTICISM OVER BAGHDAD'S COMMITMENT TO CO-OPERATE

Last chance for Unscom inspectors, says US

By Stephen Fidler in Washington

The US yesterday stepped back from military strikes against Iraq at the weekend after what it described as an unequivocal climbdown by Saddam Hussein, the Iraqi leader. It also decided to give another - possibly a final of mass destruction.

Taken at face value, the Iraqi reversal should allow inspectors from the UN Special Commission on Iraq (Unscom) back into the country to pursue what US "aggressive and intrusive" monitoring of the country's chemical, biological and nuclear arms capabilities.

It was Baghdad's refusal to permit these inspectors to carry out their tasks that led to a build-up of US forces and the weekend order by President Bill Clinton. delayed soon afterwards fol-

Security Council demands, to launch air and missile strikes against Iraq.

Officials made it clear that the US remained sceptical of the Iraqi leader's commitment to co-operate, suggesting military strikes could follow without warning if he chance to weapons inspec- did not keep his word. "We tors from the United Nations want to test that," Samuel to eliminate Iraq's pro- Berger, the president's national security adviser. said yesterday. "If it works, it will play itself out. If they don't comply, we are prepared to act, as the president

indicated.

Richard Butler, head of Unscom, told CNN vesterday officials have described as that, given full Iraqi co-operation, it would take two to three months for Unscom to complete inspections on the commission's target sites in the chemical weapons area, and longer for biological weapons where least was known. After this, Iraq would still have to submit to long-term monitoring. Inspectors from the International Atomic Energy Agency (IAEA) are also said to be close to completing their work on nuclear facilities, before they, too, move

to long-term monitoring. Mr Clinton yesterday outlined five conditions that would satisfy the US: Iraq must resolve all outstanding issues raised by Unscom and the IAEA; inspectors must

lowing Iraqi indications that inspect and to monitor all it would comply with the UN sites they choose with no restrictions or qualifications" under trag's February agreement with Kofi Annan. the UN secretary general; Iraq must turn over all relevant documents; and lastly it must not interfere "with the independence or the professional expertise of the weapons inspectors".

He said the original dissatisfaction of the US and UK with Iraq's original letter on Saturday indicating it was ready to change course had resulted in important clarifications from Iraq. These made clear Iraqi compliance would be unconditional, that decisions of August and October not to co-operate with Unscom were revoked. and that its co-operation "would be unconditional and complete".

Mr Clinton made clear his view that the use of military force would have, in US eyes, have "marked the end "If we take military action.

we can significantly degrade the capability of Saddam of mass destruction and deliver them. But it would also mark the end of Unscom... Then we would have no oversight, no insight, no involvement in what is going on within

Many analysts have detected a shift in opinion within the administration in

Iraqi policy this year, following a growing frustration with the repeated cycles of confrontation with Iraq, military build-up, and last ditch moves by the Iraq leader usually aimed at splitting the UN Security Council.

This shift towards a policy of that without Unscom, the "containment" of Iraq - legal basis for sanctions on backed up by military Iraq would have weakened, strikes - looks to have been delayed by the weekend's

### Members mull Iraq's climbdown

By Robert Graham in Paris and Our International Staff

The United Nations Security Council was in session last night to debate Iraq's 11thhour acceptance of arms inspections and its commitments to comply with UN resolutions.

The Council members, the US, UK, France, Russia and China, were expected to other Council members weldraft a statement following their failure to arrive at a conclusion on Iraq's initial moves on Saturday night.

Irag's ambassador to the United Nations told the Security Council that Bagh- with oversesing the removal

dad had rescinded its ben on the weapons inspectors unconditionally and had later revised its letter to try to meet US objections.

iraq's initial move split the Council, which was unable to reach agreement on Saturday on whether to accept the

Russia, China, France and comed Baghdad's decision. The Council was yesterday also expected to discuss whether to send inspectors from the UN Special Commission (Unscom), charged

tion, back to Baghdad. France, which played a big part in resolving the previ-

ous lragi crisis in February, was quick to welcome the last minute climbdown by Baghdad, However, it took a 50-minute, three-way conversation among President Jacques Chirac, President Bill Clinton and Tony Blair, UK prime minister, to smooth out potential misunderstandings over the next US moves to follow the Iraqi decision to resume co-operation with the United Nations weapons

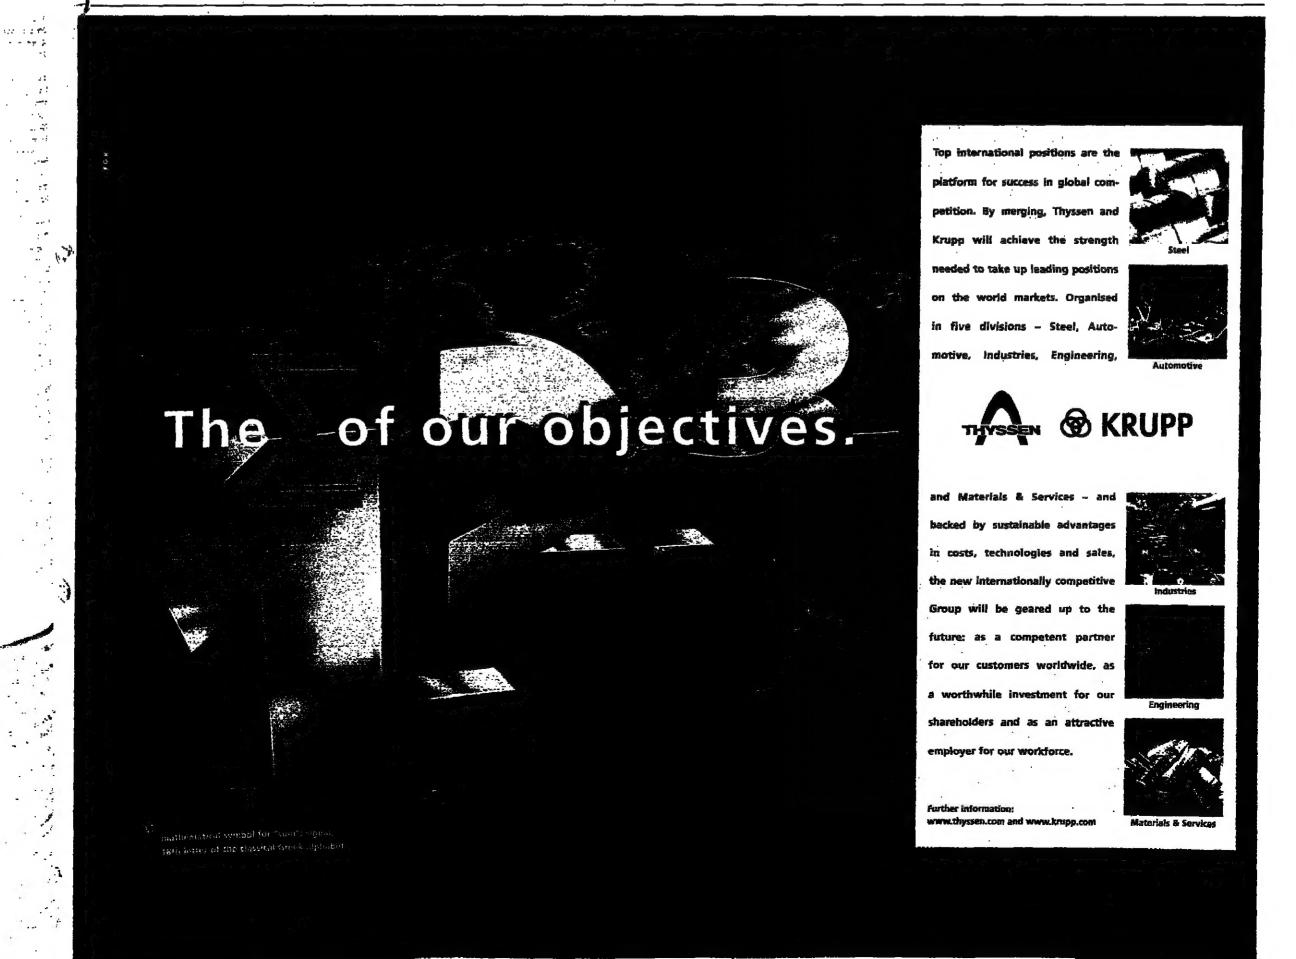

divisions in the ranks of the Council in his letter by addressing a special annexe to France, along with China and Russia. Throughout the present crisis. France has refused to endorse any US military action against Iraq but equally had warned Baghdad that it had no support for its policy of refusing

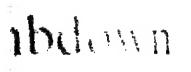

Hussein had sought to create

to co-operate with the UN. France remains sympathetic to Iraq's demand for a clear calendar that would show the steps necessary to remove the crippling UN embargo. This marks a clear Iraqi President Saddam distance from the position

spelled out yesterday by Mr Chinton. Paris also believes calls for a change of regime US president yesterday do little to encourage the Iraqi strongman to co-operate on anything other than a minimal basis. China, which has been

pressing for a peaceful resolution of the crisis, yesterday welcomed Baghdad's latest he is being targeted for attempt to avert conflict. A becoming a political rival to foreign ministry spokesman said: "We hope the Iraqi side will honour its pledges and sincerely implement all relevant Security Council resolu-

### Serbia offers direct talks with ethnic Albanians

**NEWS DIGEST** 

Serbia threw down the gauntlet over its troubled Kosovo province yesterday with an offer to host direct, internationally monitored negotiations with the ethnic Albanian major-

The proposal by Sarbian President Milan Milutinovic did not appear to have been co-ordinated with either leaders of the ethnic Albanians who make up 90 per cent of Kosovo's population or the western mediators trying to broker

A statement from Mr Milutinovic's office, carried by Tanjug news agency, said Belgrade would invite ambassador Christopher Hill, the special US representative for Yugoslavia, the ambassadors of the Russian Federation and of China, and the ambassador of Austria, holder of the European Union presidency.

Serbia has previously offered talks on Kosovo, but ethnic Albanian leaders have refused, saying Belgrade must first withdraw its forces, whose campaign against the guerrillas drove more than 250,000 people from their homes. Reuters, Belgrade

KURDISH LEADER IN ITALY

### Ankara seeks Ocalan back

Turkey yesterday pressed Italy for the extradition of Abdul-lah Ocalan, the Kurdish rabel leader, saying that granting him asylum would amount to "opening doors to terrorism". Kurds in Italy, Germany, Austria and Romania launched protests and hunger strikes in fervent shows of solidarity with the rebel leader. Kurds came to Rome by bus and car from across western Europe for a 1,500-strong protest outside the military hospital where Mr Ocalan is believed held under tight security.

Mr Ocalan was arrested on Thursday at Rome airport as soon as he stepped off a flight from Moscow, where he had sought asylum after fleeing his hideout in Syria. He leads the outlawed Kurdistan Workers party, which has been fighting for Kurdish autonomy in south-east Tur-key since 1984. The conflict has killed nearly 37,000 people. AP, Ankara

PAULA JONES SETTLEMENT

### **Outlook improves for Clinton**

President Bill Clinton's senior legal and political advisers are hoping last week's agreement to settle the Paula Jones sexual harassment case will take yet more steam out of impeachment proceedings against Mr Clinton, scheduled to begin in earnest this week.

On Friday, the president agreed to pay Ms Jones \$850,000 to drop her case, which led Indirectly to the Monica Lewinsky impeachment investigation. The agreement did not include any admission of wrongdoing or apology from the president, but was, his lawyers said, born of a desire to bring to an end the four-year lawsuit. Ms Jones made it clear, in settling her case with the president, that she was rejecting an additional \$1m offered her by a New York property developer.

The House of Representatives judiciary committee will hear testimony on Thursday and Friday from Kenneth Starr, the independent prosecutor. A growing number of Republicans are anxious to find ways of abandoning the case. Gerard Baker, Washington

**BURMESE JUNTA** 

### Foreign minister replaced

Burma's military government replaced its foreign minister at the weekend, ending the tenure of Ohn Ghaw, long the international face of the country's junta. Win Aung, a military officer who has been in the foreign service for a was named to replace Mr Ohn Ghaw.

Mr Win Aung is expected to bring new vigour to the foreign minister's post, which has the task of rejecting charges of human rights abuses and lack of democracy in the country at such forums as the UN and the Association of South East Asian Nations. In past years, Mr Ohn Ghaw appeared to grow tired of defending a military junta that as a civilian he was not a part of and had no influence over. Mr Win Aung is said to be close to General Khin Nyunt. military intelligence chief and architect of Burma's recent opening to the outside world. Ted Bardacke, Banckok

TECHNOLOGY EXPORTS

### India angry at US blacklist

India has said it will protest to the World Trade Organisation against the US decision to bar sensitive technology exports to 40 government agencies and 200 related sub-sidiary companies, a component of US sanctions against India for conducting nuclear tests.

Ramakakrishna Hegde, commerce minister, said on Saturday that by issuing the blacklist last Friday, including altogether 300 Indian and Pakistani government "entiti the US had violated "WTO philosophy and rules".

The US list formed part of a series of sanctions, some since lifted, imposed after India's nuclear tests in May and Pakistan's metching explosions. Mark Nicholson, Delhi

### Economic woes sway voters in Okinawa

By Michiyo Nakamoto in Tokyo

Economic anxieties overrode opposition to US military bases in elections for the Japanese governorship of Okinawa yesterday, which resulted in victory for Keiichi Inamine, a local business leader.

The election of Mr Inamine highlights growing concern in Okinawa, one of Japan's most economically depressed prefectures, that strong resistance to the US military presence was burting the local economy. His main campaign pledge had been to focus on reviving the economy.

Mr Inamine's victory over Masahide Ota, the incumprospect of a breakthrough won approximately 370,000 its agreement with the US.

votes compared with Mr Mr Inamine, on the other Ota's 330,000, according to hand, has been calling for a preliminary results.

Liberal Democratic party ahead of an official visit by this week.

The Japanese government has been in a bind over Okinawa, where strong local resentment towards the large number of US military average, was the lowest bases had frozen an agreement with the US to transfer the Futemma air base to an offshore heliport. As governor, Mr Ota had

called for Futemma to be moved out of Okinawa. His opposition to its transfer within the prefecture, combent, who had called for the removal of all US bases from the prefecture, raised the bined with local protests over the offshore heliport plan, had embarrassed the central government, which over Okinawa. Mr Inamine was prevented from fulfilling

### UK leads in returns on groups' assets

ters next Monday.

The overseas operations of the UK's largest multinational companies are more profitable than those of leading international competiaccording to research from Oxford University.
The study, based on analy-

sis of more than 200 of the biggest companies from 12 countries, says UK companies' return on foreign assets averaged 7.8 per cent in 1996-97. The average for all companies was 4.8 per cent.

A Department of Trade and Industry report last week said UK companies invested about a third less. and had lower gross fixed tangible assets per employee, than businesses in mainland Europe, North America and Japan.

The study also finds that

the profitability of overseas operations has fallen sharply since 1996, when they slipped below those from

It warns that comparing performances is complicated by differing national reporting and accounting requirements and exchange rates. UK companies' return on

overseas assets was more than 1.5 percentage points higher than US comp and more than double that of Canadian companies - the third-most profitable group. British companies' performance reflected their strong showing in pharmaceuticals, electronics and services. where returns were generally higher than in heavy manufacturing

Kingfisher, the UK retailer, achieved the highest return on oversess assets of all surveyed, followed by Glaxo Wellcome, the UK pharmaceuticals group, and Coca-Cola, Intel and Microsoft of the US.

The worst performers overall were Japanese and Australian companies, with average returns of 1.3 per cent and 0.3 per respectively.

The study says smaller companies had more profitable overseas operations than big ones, and that there was no clear link between returns on overseas assets and their importance in a company's total business.

Mr Ashdown is expecting a rough ride from the 30person executive, which includes grass-roots party activists, although he is unlikely to be defeated in any vote. There is particular anger that Mr Ashdown decided to broaden the remit of the cross-party "Lib-Lab" cabinet committee in secret talks with Tony Blair, the prime minister, and with little consultation. Donnachadh McCarthy, a member of the executive, said: "It is a betrayal of every-

However, Mr Ashdown was yesterday unrepentant, and said he was determined his party should play a pivotal role in reshaping centre-left politics. George Parker, London

#### UNFAIR DISMISSAL PROPOSALS

Even if the government retains a cap and raises it to 250,000, as hinted at the annual Trades Union Conference meeting in September, employers fear an increase in potential liability as awards for unfair dismissal are - in principle - in addition to compensation for breach of an employment contract. Robert Pice, London

DRUGS IN WORKPLACE

### Number of abusers 'on rise'

staff who abuse alcohol and take illegal drugs, and are who have a drink problem. A survey of 1,800 personnel staff by the Institute of Personnel and Development found that 46 per cent had received reports of alcohol misuse by staff in the past 12 months, compared to 35 per cent in

illegal drug taking by employees – up from 8 per cent in 1996. It is estimated that the economy loses £3bn (\$5bn) every year to drink and drug-related itiness

Nine out of 10 companies encouraged staff with an alcohol problem to seek help and counseiling and half allowed time off for rehabilitation.

However, almost twice as many companies always dismissed employees found to have used illegal drugs (31 per cent) as sack those who abused alcohol (18 per cent), regardless of the job they did. Eight in 10 encouraged help

**NEWS DIGEST LLOYD'S** 

### Policy set to protect rights in intellectual property

Underwriters at Lloyd's insurance market have developed an innovative way for companies to protect their intellectual property rights, an increasingly significant part of busi-

Kiln, a managing agent at Lloyd's, has worked with Emst & Young, the consultancy, and Hammond Suddards, the law firm, on suitable methods for companies to value and identify risks to their intellectual property rights.

A recent survey by the Association of Insurance Risk Managers found the main concern among their members was intellectual property and brand reputation - even ahead of the millennium bomb software error threat to

Kiln said the significance of intellectual property could be seen in the shift from a production-based economy, founded on land, factory plants and labour, to a knowledge-based economy where ideas drove companies and provided rapid growth.

Citing the make-up of the Fortune 500 list of the largest companies, Klin said 60 per cent of the organisations on the list in 1975 had disappeared from it by 1995. Even more strikingly, in 1975 more than half the value of all the 500 companies was attributable to tangible assets. By . 1995 that figure had dropped to about 25 per cent. Almost half of the intangible assets now in the majority were some form of intellectual property. Andrew Bolger, London

LIBERAL DEMOCRAT PARTY

Leader faces 'betrayal' claims

Paddy Ashdown, leader of the opposition Liberal Democrat party, will today face tough questioning and accusations of "betrayal" from some members of his party executive, over his move to strengthen relations with the Labour govern-

thing Paddy Ashdown ever said he stood for."

### Fears over 'fat cats charter'

Employers are increasingly concerned that government proposals to lift the compensation cap for unfair dismissa could become a "fat cats charter", according to research by a City of London law firm.

A survey of companies by lawyers Fox Williams found they fear abolishing the £12,000 (\$19,920) compensation ceiling could expose them to unfair dismissal claims by sacked executives for unlimited compensation.

Companies are reporting an increase in the numbers of

Eighteen per cent of companies have received reports of

and counselling with drug abuse but only 35 per cent allowed time off for rehabilitation.

Oonagh Ryden, the institute's adviser, said the difference reflected legal and social attitudes to drugs and alcohol. Simon Buckby, London

Pre-announcement of Request

The World Intellectual Property organization (WIPO) is one of the Specialized for the promotion of the protection of intellectual property throughout the world.

WIPO is preparing to issue a Request for Proposal (RFP) to solicit bids for a more than 300 intellectual property offices worldwide.

More information about this global project is made available on WIPO's Web site (http://www.wipo.int/eng/general/scit/wipogin/index.htm),

http://www.wipo.int/eng/general/scit/wipogin/announce/rfp98046/index.htm) to the following address (by mail, fax or e-mail) preferably before November

**OPERATING RATIO** 

Ratio between expenses and net banking income. Dexia posted an operating ratio of 51% on 30 June 1998.

Bexia, the banking partner for local government in Europe, was created by the merger of Crédit local de France and Crédit Communal de Belgique. Already European

leader in the financing of public service facilities and with shareholders' equity of 6.2 billion euros, Dexia is currently expanding into bank insurance and asset management.

CONSORTIUM **DEPARTMENTS** 

Four Dexia units report to the consortium committee: planning and management control, risk management. human resources and communication.

**PFANDBRIEFE** 

Fixed rate German bank bonds reserved to mortgage banks. Pfandbriefe issues from

RATING

Internationally accepted indicator measuring the creditworthiness of major banks. Dexia is rated AA+/AaI by Standard & Poor's and Moody's.

**BIL**online

High security online banking service via the Internet for the Banque Internationale à

Luxembourg customers.

**OPERATING COMPANIES** 

Dexia Hypothekenbank Berlin AG are rated AAA.

**ADVISOR** 

He helps projects promoters (municipal or corporate projects) assess the leasability of a project and negociate with arranger banks. Dexia is currently acting as advisor for a group involved in the financing of motorways in Portugal.

**SAVINGS DEPOSITS** 

The outstanding total for savings deposits from Dexia retail banking customers stood at BEF 492 billion/FRF 80 billion on 30 June 1998.

Organises the syndication of operations and investment

Crédit local de France, Crédit Communal de Belgique and their subsidanes, Dexia Project & Public Finance International Bank and Banque Internationale a Luxembourg.

Dexia consists of four operating companies:

in capital markets. Crédit Communal de Belgique and Banque Internationale à Luxembourg are lead managers for euro bonds issued by Crédit local de France.

LEAD MANAGER

**EURO MEDIUM TERM NOTES (EMTN)** 

Euro bonds issued as part of a pre-established programme. Crédit local de France has issued FRF 29 billion in EMTN since 1st January 1998.

**ARRANGER** 

Finalises legal and financial operations and organises the implementation of the package. Dexia has acted as arranger for major projects in France (Strasbourg Tramway, Normandy Bridge) and bond issues for major towns (Lyon...).

COMMERCIAL **BANKING LOANS** 

Credits to small and medium sized companies and the self-employed, consumer financing and mortgage loans. The outstanding amount on 30 June 1998 was BEF 401 billion/FRF 65 billion.

Crédit Communal

# Big Shots miss the target

Choose your business hero, get the book, then follow the 10 easy steps to success - there's absolutely nothing to it

Who would you most like to be: Richard Branson, Jack Welch, Rupert Murdoch or Bill Gates? You choose and I'll tell you how. At my elbow I've got four little books called Big Shots, each of which reveals how to become one of these great men in 10 easy steps.

This isn't rocket science, as the publisher, Capstone, points out, but pocket science. For only £8.99 you have in your hands a nifty change your life forever. So, you have chosen

Rupert Murdoch, The World's Greatest Dealmaker. Easy. Step 1: Be pragmatic. Step 2: Forget nice. Step 3: Gamble. Step 4: Lead from the front....You've changed your mind? You are not a bastard and you are funny about risk?

OK, let's try Bill Gates, The World's Richest Business Leader instead. The number one secret here is: Be in the right place at the right time. Oh dear, does that rule you out before you even begin? This is the wrong time, and you are in

the wrong place? Don't worry. You can always be Jack Welch, The World's Greatest Turnaround King. Here is how to become Welch. Step 1: Invest in people. Step 2: Dominate your market...or get out. Step 3: Never sit still. Step 4: Think service, service, service... Step 9: Stick around.

What's that? You think being Jack Welch sounds too much of a hard grind? Well then, there is nothing else for it. You will have to be Richard Branson, The World's Greatest Brand Builder.

To be the Virgin King, you must: a) Keep it casual. b) Haggie. c) Smile for the cameras. d) Make work fun. e) Never lose the common

Why not buy a rail company and try it out?

In the old days of jobs for life it made sense for an employer to behave in a paternalistic way. Then came a brief period in which paternalism fell from favour there seemed no place for it when everyone "owned" their own careers and iob-hopped as if their lives depended on it. Now paternalism is back, but in new clothing. Employers are more desperate than ever to hire and keep good people and are finding that one way of doing it is to offer to take care of their whole lives.

Consider the case of software company SAS Institute. According to an article in the FT last week, SAS employees can put their babies through the company créche, and their children through the company school. They can go to the company's de luxe exercise classes, have their illnesses cured by company doctors, eat SAS food at lunch time and take SAS left-overs

home for supper. No doubt this is all very convenient, but it strikes me as creating the wrong sort of relationship between worker and employer. For a start, if your life is that closely bound up with the company, you may be less likely to jump ship, but your decision to stay where you are could

be for the wrong reasons. More alarming is what happens should the company decide that it wants to get rid of you. Maybe SAS has no intention of getting rid of anyone, but still, just supposing.

Being made redundant is bad enough, but if you are cast out not only from a job but from a way of life for your whole family it would be devastating. A healthier relationship would be to make the job itself as good

BANKRUPICY WAS A SETBACK, BUT I'VE ISTILL GOTTHE ROYALTIES FROM MY BOOK ON HOW TO MAKE IT IN BUSINESS

and let the employees get on with the rest of their lives themseives.

Finally, the penny has dropped. Consultants are coming to realise that the outside world sees them as arrogant, overpaid teenagers who think they knew all the answers. Leafing through the business magazines. I detect a new defensive trend in consultancy advertising that attempts to create a more mature, less aggressive

The latest ad from KPMG shows a picture of children running into school Above, it says: "They skip irto the building each morning, so young, so innocent, so helpless. Are we referring to your children or your consultants?" And underneath: "Our consultants have an average of 13.5 years experience." Likewise an ad from Leloitte consulting says: "We rever presume to have all the answers. Because we've learned over the years that certain insights can only come from inside our clent's

organisation."
This kind of thing is all very well. But if I were about to spend several million dollars getting the consultants in. I might need something a little more positive.

The news that a firm's consultants each have 13 odd year's experience (of what) might not be enough to swing it. \*\*\*

Further to my column last week on e-mail acronyms, a reader alerts me to another one, TNSTAAFL. This stands for that highly debatable saying. There's no such thing as a free lunch. On reading that I daresay you are ROTFL or - as we long-winded pedants prefer to say - rolling on the floor laughing.

BUSINESSES EDUCATION ---BUSINESS

### Putting theory into practice

Victoria Griffith on the pressures drawing business schools into consultancy work

Move over Bain & Co! Eat your heart out Boston Consulting There is new competition on the street, and it is coming from an unexpected source tademics. Business schools reinventing themselves as consultancies, and are winning the admiration of

MBA programmes have long encouraged professors to carry out consultancy work on the side as a way to keep them in touch with the real world (although schools often monitor the amount of time spent on such work).

Yet traditionally, such basis. Corporations might ask the advice of management gurus Michael Porter or Rosabeth Moss Kantor, both of Harvard, for instance, but Harvard Business School itself remained aloof from such dealings. Number a new consulting added, business schools are placing themselves in the

driver's seat. They manage the relationship - even assigning professors, or groups of professors to certain corporations. UK business school Ashridge, which probably saw the trend first, has been

operating a separate consultancy practice since 1987. In the US, business schools such as Bahson, the University of North Carolina (UNC) at Chapel Hill's business school, and the Fuqua School of Business at Duke

are re-fashioning themselves as miniature consultancies.

US business schools began to develop contacts with corporations earlier this decade, when "tailored courses" for individual companies came into vogue. Companies love the individual attention, and the "executive education" arms of many MBA programmes have become extremely profitable.

Yet corporations say they need more than just classroom instruction. Executives are increasingly demanding follow-up sessions, coaching and mentoring, even direct involvement in strategic

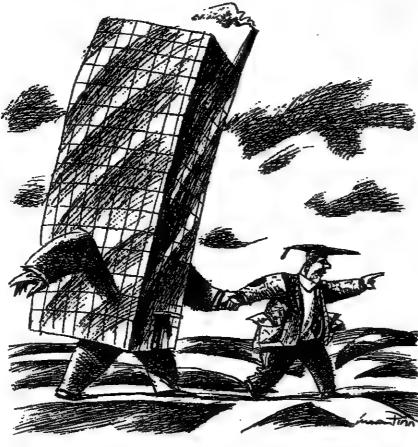

Typically, business schools offered off-the-shelf education products to corporations." says Steven Hicks. head of custom program at UNC Chapel Hill's busi-

ness achool.
"But consumers of business education got more demanding, so schools started offering custom courses. Consulting work is an obvious outgrowth of executive education."

When Hans-Peter Sitel, head of a computer products division of Siemens-Nixdorf, needed outside advice two years ago on how to change his group's corporate culture and roll out strategic planning, he turned to Babson College, a business school just outside Boston.

The company had been at the school, but Mr Eitel wanted a greater commitment. He got it. Soon, Babson professors were advising the company on everything from product launches to

"We wanted help and advice on demand," says Mr

restricted to the times the

As the relationship deepmed, Siemens has sought advice from Babson professors on a myriad of topics. tant to launch a new prod-

'Consulting work is an obvious outgrowth of executive education'

cial risk, Babson consultants persuaded them to go ahead. They explained that if you look at new products from a traditional accounting point of view, almost all launches seem a bad ides," says Mr to go ahead." Consulting can

extremely profitable. Ashridge says it makes £2.5m a be difficult. year on its small practice. Yet business schools say

salves as consultancies. Some schools are still reluctant to stray too far from classroom instruction. Many say they differ from consultancies because they do not offer advice; rather. they try to lead executives to the correct decision. "We don't catch fish for companies; we teach them how to fish themselves," says Prof Hicks of UNC Chapel Hill. ing and teaching can be very thin, as is obvious to anyone

**CULTURE POTTED THEORIES** 

### Difficulties in a marriage

the bizzest obstacles or com

mergers. The problem is that much greater for multinationals such as Chrysler and Daimler-Benz where the merging businesses must fuse the characteristics of their countries of origin.

The difficulty of marrying cultures has highlighted the work of two Dutch academics, Geert Hofstede and Fons Trompensars, who have car-ried out related, but independent research, into cultural differences in societies and

Mr Hofstede, whose research developed studies by Mauk Mudler, a Dutch social psychologist, identified five measurable characteristics of national cultures. First is what Mudler called power distance - the emotional distance that separates subordinates from their bosses. In France, for example, where status is valned, the power distance is much greater than in Swe-

den, a less hierarchical soci-Mr Hofstede created a ower distance table, drawn from a survey of IBM employees in different countries. The high scorers were those societies in which managers exercised high levels of control. Those with the lowest scores had more consultative and interdependent

Cultural differences relationships between man-liave created some of agers and subordinates, The other four dimensions

are: individualism collectivism; gender differences, masculinity verses femininity; uncertainty avoidance, related to whether people are risk tak-ers or risk averse; and time orientation - a recognition that some cultures prefer negotiations and relation ships to "bed in" over a period of time.

Mr Trompenaars, Netherlands-based consultent, progressed this work in his 1993 book Riding The Woves of Culture.

One of his key findings ence between two cultural types - "particularists" (those who have a sense of obligation to a colleague or friend, mostly found in south east Asian societies) and "universalists" (those who feel constrained to abide by rules, characteristic of North American societ-

PART-TIME PACULTY POSTTIONS - SPRING 1999

INTERNATIONAL TRADE & MARKETING DIPARTMENT BUSINESS & TECHNOLOGY DIVISION FASHION INSTITUTE OF TECHNOLOGY® - SUNY Seventh Avenue at 27 Street, New York City 10001-5992 Application deadline: November 20, 1998

F.I.T.O. an internationally known leader in career education, is a college of art and design and business and technology of the State University of New York offering 30 career-related majors leading to A.A.S., B.F.A., B.S., and M.A. degrees.

International Trade & Marketing Department seeks industry professionals, active or retired, to serve as part-time instructors. Daytime classes only. Minimum of 10 years' industry experience and baccalaureate degree required; teaching experience preferred. Need three instructors with expertise in (1) global sourcing and supply chein management; (2) globel marketing and distribution chain management; and (3) import/export procedures. All positions require broad cross-cultural negotiation skills. Submit resume, letter of interest and the phone numbers/mailing addresses of three references to: Bruce M. Malamut, Chair, International Trade & Marketing Department, F.I.T., Seventh Avenue at 27 Street, Room 8-436, NYC 10001-5992

The number of air bridges

A final verdict on where to build an international airport to relieve congestion at Amsterdam is edging closer, says Roger Bray

new international airport should be built on land reclaimed from the North

The ambitious project aims to counter inevitable congestion at Schiphol. The cost of building a new airport has been put at about Fl 30bn (£9.5bn), but its exact location is far from clear.

"At first the proposal was to put it 10km offshore. Then it was 20km. Now the planners are talking about building it 30km from the coast, If it gets any further away, we'll be able to call it a UK airport," says Léon Verhailen, passenger marketing director at Amsterdam's

The irony is that Schiphol has long been marketed as just such an airport: an alternative jumping-off point for passengers from the UK regions who would otherwise need to change flights

Nearly half its annual total of 27.4m scheduled travellers are transfer passengers, up from 35 per cent

Until the governis close But Schiphol faces a tough ment decides what to do government is close But Schiphol faces a tough ment decides what to do to deciding whether a task to persuade them to about building a new airkeep coming. As business expands, it will become increasingly difficult to fulfil the current promise that short-haul travellers need only 40 minutes between programme to expand its terflights and that longhaul passengers can switch

> The airport suffered Schiphol faces a embarrassing delays this summer, caused by a new air traffic control system, bad weather and building work to persuade which forced more aircraft to park at remote stands.

in 50 minutes.

But in the longer term it faces a dilemma common to many others in Europe: how to balance inexorably rising demand for air travel against the objections of environmentalists and antinoise protesters. The airport is now allowed

to handle 20,000 extra flights each year until 2003, when a fifth runway will be fully operational. That should allow the airport to keep pace with average European growth of about 5-6 per cent. But with airlines acquiring larger aircraft, passenger

Nevertheless it has enable luggage for delayed flights to be held separately. launched the first phase of a The expected demise of minal. The central lounge

duty and tax-free sales to passengers flying within the EU, which is likely to deprive the airport of some Fi 100m a year, has prompted a retailing rethink. The airport has decided to shun individual shops dedicated to a brand. Existing outlets, many of which are old-style counters, will be replaced by islands dedicated to one product, from books and newspapers

to CDs and computers. An internet cafe will be installed for passengers. If they have enough time between flights, travellers will be able to play golf at a gate passengers flying new course close to the airport. The builders are in and will be working through the winter. It is hoped the job will be completed when the duty-free axe falls next summer.

By then, it is hoped, the issue of where to build runstudied: an "overflow" airport for cargo, charter and low-cost airlines on reclaimed land in the Maas delta near Rotterdam, which would still leave Schiphol needing to handle an eventual 60m passengers a year, against its current 35.5m. Then there are two sites which would siphon off all transfer traffic - one in the ijsselmeer (formerly called the Zuyder Zee) - and the

with only 20m passengers to worry about. Mr Verhallen says Rotterdam is far from ideal, partly because of a lack of infrastructure. Birds will be a problem in Ijsselmear. Their habitats should not be disturbed and they may pose a

North Sea option, Either of

these would leave Schiphol

hezard to sireraft. Schiphol favours the North Sea solution, but that is also the most costly.

• Euroscot Express, the UK airline, has launched a link between the south coast town of Bournemouth and Schiphol airport with return fares starting at 2117.50. Weekday flights depart at 11.50am. On Saturdays and Sundays they leave at numbers may increase more from piers to parked aircraft issue of where to build run-rapidly than take-offs and will be increased from 80 to ways will be resolved. ### Expensive times for tourists

Hire a car in Amsterdam and you pay a bigger proportion of the rates in tax than in any other leading city, a report shows. Copenhagen is top of the hotel and restaurant tax league - and Chicago is the most

expensive for air travel. The figures come from the Vancouver and Venezuela. The former will open in World Travel and Tourism Council, a forum for travel industry leaders, which city's international airport in regularly monitors such the suburb of Burnaby. It will charges. It says seven destinations charge more part of a C\$200m than 30 per cent of the car rental price in tax. After offices, shops and a conference centre. Amsterdam (50.1 per cent), the most demanding are London (37.9 per cent), Vienna (34.7 per cent), open later the same year in the industrial city of Maturin, Copenhagen (33.1 per cent) and Frankfurt (32 per cent). Hotel tax represents a quarter of the hotel bill in the and conference space will include a ballroom, Danish capital. Next in the accommodating up to 400 people, which will divide into hotel table come Prague (22.31 per cent), Buenos Aires (21 per cent) and Bombay and Delhi (both 20 per cent). Luxembourg/

The WITC says that, in the past four years, air passenger charges have sed in 45 of the 52 destinations it watches and have doubled in 10 of them. Top of the list in absolute dollars is Chicago, which charges \$65.75 per

#### Air travel discounts

Airlines have started to offer discount deals on corporate contracts as companies cut back on business travel. As a result, says travel agent Carison Wagonlit, average to only 1.5 per cent on a rolling annual basis. Last year they were running at around 13 per cent.

### More seats on Air Canada

Air Canada has increased the number of seats this

a Fokker 50 turboprop. Departure times will allow a London-based executive to , . catch the 8am flight, arrive at 10.25am and return on the 5.35pm service.

### Luxury hotel's historical link

An 18th century house where Lord Byron married Anne Isabella Milbanke, is being converted into a 40-bedroom luxury hotel and conference centre. Seaham Hall is off the A19 on Britain's Durham coast. The hotel, which opens next year, will have a health club and will offer internet access from all its rooms.

### The world from vour hotel room

Guests at the Ritz-Carlton in Hong Kong are now being offered unlimited free e-mail and internet access from the 20 new "WorldRooms" installed in the hotel, writes Nigel Page, WorldRooms also provide online news and business databases. The technology was developed to deploy a virtual local area network without cabling. Guests can send or receive a fax, place a telephone call and acces the internet via a laptop or workstation simultaneously using a single phone line il

innovation but also its sophisticated products. writes Peter Marsh

Plastic fuel tanks in cars were once considered a potential safety risk because of problems associated the joints connecting the tank to the rest of the fuel system.

The fact that nowadays few car companies - or their customers worry about this can be ascribed partly to a German company which is a world leader in vacuum technology, and has an impressive record in applying its expertise in a variety of indus-

Pfeiffer Vacuum is the biggest maker worldwide of vacuum turbo-pumps, claiming 30 per cent of the DMS00m (£111m) -a-year global market. Yet even though its vacuum turbo-pumpe are among the most technically sophisticated products found anywhere, the company has hit the headlines largely for financial

in 1996 it became only the third man company - after Daimler-Benz and SGL Carbon. both of them much bigger corporations - to list its shares on the main New York Stock Exchange. It was also the first German company to list in New York without having first done so in Germany.

The company, based in Assiar near Frankfurt, and which dates from 1890, decided on this course after being spun out of Oerlikon-Bührle, a big Swiss engineering company which had owned it since the 1970s. Oerlikon was forced by antitrust agencies to divest Pfeiffer after acquiring Leybold, another big maker of vacuum pumps which is also based in Germany.

Rather than float initially in Germany (where, since April, the company has had a separate listin an the country's Neuer Markt for-Ifast-growing businesses), Pfeiffer opied for New York, partly because it has 30 per cent

"We also liked the US's clearer Germanyl" says Wolfgang Donexecutive. Mr Dondorf, an engi-

years ago with the mandate of giving Pfeiffer a separate identity. He has accepted the chal-lenge. What's the difference between selling shares and selling vacuum pumps?" he asks.
"Basically nothing. Now we are a public company in our own right, we have to explain ourselves to the financial community, which

business strategy." With sales last year of DM270m, only a quarter of which was in Germany, Pfelffer expects revenues of DM300m this year and is keen to double the figure by 2003, partly through acquisi-

helps us to create a clear-cut

Its vacuum turbo-pumps are used to create pressures of as little as one million-billionth of an atmosphere. The pumps contain up to 200 small blades fitted laterally on a shaft. This turns at 90,000 revs/minute, twice as fast as a jet engine. Air is removed by forcing it through a channel at 1km/second, or three times the speed of sound.

Devices of this sort - in which Pfeiffer's competitors include Alcatel of France and the UK's Edwards High Vacuum - can cost up to DM50,000. They are sold in a range of industries requiring extremely low pressures, from semiconductor manufacturing to specialist coating processes for spectacle lenses, compact discs and TV tubes. The

'We have to explain ourselves to the financial community, which helps us to create a clear-cut business strategy

pumps also end up inside analytical herroments.

While sales of stand-alone pumps account for slightly less than half Pfeiffer's revenues, it has used its engineering expertise to branch out into providing large pieces of specialised equipment for important customers.

An example is Kauter, the world's biggest maker of plastic fuel tanks for cars. Production of these tanks is growing swiftly as year in one of the world's most together they join snugly without accounting rules [compared with automotive suppliers seek lighter and easier-to-manufacture substidorf, Picifier's 54-year-old chief tutes for conventional metal tanks. detected, signifying a defect.

Another big job for the company has been to work on an automated production line for solar cells, being made for Balcke-Duerr, an equipment company which is part of Deutsche ing group. The DM15m system, Erfurt, comprises a vacuum

the US industrial congiomerate, much more efficiently than in asked Pfeiffer to devise a foolconventional processes proof system to test its tanks (and the assemblies that feed pet-About a quarter of Pfeiffer's revenues come from vacuumrelated projects paid for by research laboratories around the rol from them to the engine) for leaks. It came up with a large vacuum chamber into which the world such as the Jet nuclear tank assembly is passed from the fusion research team in the UK

and Bell Laboratories in the US. Pfeiffer's technical expertise extends to the manufacturing methods for its turbo-pumps. It makes its own equipment for cutting to tolerances of 10 micrometres (one-millionth of a metre) the aluminium blades used in its pumps. "We have 12 of these machines - and they do the job better than anything we could purchase from an outsider," says

The company has also come up with a technique based around the so-called "shrink-fit" methods to fit the blades into specially shaped grooves in the pump shaft. Taking advantage of the differences in the coefficient of expansion between the metal in the blades and shaft, Pfeiffer's engineers heat the blades to about 150°C, cooling the shaft with liquid nitrogen to -180°C to ensure that when the two parts which should see service next of the assembly are fitted intranced solar-cell factories many the peed for any external matechamber some 50m long which metal) that would upset the deliis in operation.

TIM JACKSON

### DigiCash is dead. Long live DigiCash!

Ill-founded fears about the security of payments across the internet have receded, leaving a window of opportunity wide open

Does the world need a new way of settling personal payments? That is the question raised by the announcement on November 4 that DigiCash, a pioneer of internet payment mechanisms, is seeking Chapter 11 bankruptcy

The decline of DigiCash comes on top of the closure of most of the market trials for stored-value electronic cards like Mondex. suggest that consumers do not actually need new ways of paying for things in addition to today's coins, banknotes, credit and debit

The problem with stored-value cards is simpler to diagnose. Although in theory it would be convenient not to have to carry any cash, Mondex-type cards do not become truly useful until you can use them everywhere.

If you still have to carry a pocketful of change to buy a newspaper or a bar of chocolate. or to travel by public transport of taxi, then there is nothing to counterbalance the inconvenience of carrying another card - which, incidentally, is more troublesom than a credit card because careless customers who lose it are more likely to Vegroot saol

DigiCash's problem is more subtle. The company's technology offers two important attractions: anonymity and security. Two years ago, the slow acceptance of electronic commerce led many pundits to believe that systems like DigiCash, in which both customer and merchant have to set up special bank accounts. were needed to persuade consumers to start buying

Today that fear has receded; even though DigiCash and similar systems have failed to take off, consumers in the US are now happily doing busines online anyway. In addition to traditional suppliers offering a web-ordering option, like Dell, at will achieve more than \$100m in 1998 consumer sales.

DigiCash's backers were right in believing that consumers would grow increasingly fearful of the use of their personal data, But this has not created market demand for anonymity in transactions - partly because most spending is on mail-order purchases of goods, where you have to give your name and address to receive

your box. Instead, it has prompted a flight to quality: customers are willing to entrust their personal data to strongly branded companies like Amazon, but not to just any merchant they find on

As for security, the fears have so far proven largely misplaced. Two years ago, newspapers and stories about the stealing of credit-card numbers over the Internst

Today, a growing number of inexpert web users are getting the message that sending data over a secure connection to an online merchant is more reliable than handing a card to a waiter in a restaurant.

The growing number of online merchants guaranteeing to cover any uninsured losses resulting from compromise of credit-card data makes the point more clearly still.

So is DigiCash doomed to be sold to a company that wants to recycle its intellectual property as a secure voting system? Not necessarily. For there is another advantage to its system that has not yet been exercised: its ability to handle very small payments cost-effectively. Until recently, I used to think

that micropayments, as they are called, were an answer to a non-question. Micropayments are not relevant to the selling of goods because the cost of shipping already places a floor on the lowest value of order that a mail-order company can take from a customer. Their target market was the sale of services particularly information in digital form, downloaded from the internet.

Yet dozens of companies have failed to make money by selling

prominent case in point is IdeaMarket, which hoped to sell newspaper articles for prices as low as a couple of dollars. The venture didn't succeed - partly because consumers dislike paying such a high price for something they know has a very low marginal

Although the jury is still out, because even the strongest brand owners are finding it hard to sell consumers longer-term subscriptions to information services, it seems more likely that pay-per-year is a better model than pay-per-story for reasons entirely unconnected with the transaction cost issue.

Yet there is a role in the world for a son-of-DigiCash. To see where, you need look no further than eBay, the person-to-person auction service that went public a couple of months ago and is now valued by the markets at more than Sibn.

The average price of products sold in eBay's auctions is about \$40, which participants settle by sending each other cheques in the muil.

With about 900,000 simultaneous auctions taking place on the company's web site. it is clear that eBay alone creates demand for a low-cost and eliable payments mechanism.

This is particularly true for transactions across borders. Although cheques are convenient for consumers in one country. the fee charged by most banks for paying in a cheque in a foreign currency is usually at least \$20 and often considerably more.

The businesses best-positioned to serve this market need are of course the credit card companies A simple way to solve the problem would be to allow people to use their credit cards not only to make payments but also to receive them. At present, the rules of credit

card settlement systems forbid this, But if a new DigiCash manages to build a business in erson-to-person settlement of small sums, it will be more because the credit card of an opportunity than because of the intrinsic merits of a new and separate system.

TECHNOLOGY SHIPBUILDING

### From crude to state of the art

David Tinsley looks at how an innovative shuttle tanker has stabilised the collection of oil and made the process more environment-friendly

steady while it is being loaded with crude oil in sens where the waves can reach 6m high, winds are heavy and currents strong? With minimum damage to the environment, for good measure, and during a lifespan of 40 years.

In the harsh climate to the west of Shetland, you need a ship like the Korean-built Loch Rannoch, a 130,000 dwt shuttle tanker which recently arrived in Scottish waters. Shipbuilding experts say it provides a new benchmark in specialised tanker design and construction.

Believed to have cost about \$85m (£51m), the vessel, purposebuilt by Daewoo Heavy Industries, combines robustness, stateof-the-art control and positioning technology, and the principle of full engineering and propulsion system redundancy. This means that everything important to its mouth running is duplicated there are two main engines, twin propellers, twin rudders, and a

· 等多期过多产品

How do you keep a tanker failsafe dynamic positioning system to keep the vessel on the

> embraced increasingly in the offshore tanker sector, where it has been taken a stage further by Loch Rannoch. But it has been largely ignored by the general tanker shipping sector - with some notable exceptions in Scandinavia and the US - because it adds to the cost.

The Loch Rannoch has been brought into service under long-term charter, or hire, to BP from A. P. Moller, the Danish group which owns it and financed the shipbuilding project. Its role is to transport crude from the Schiehallion field to the Shetland terminal at Sullom Voe, working continuously whatever the weather and sea conditions. On each voyage it will collect up to 850,000 barrels of oil processed by a vast floating production storage and offloading (FPSO) unit which is stationed permanently on the field.

The latest analytical techniques and risk assessment meth-ods have been used to create a design that meets its tough operating criteria. Nothing has been left to chance - unusually, the

### Blurred focus on tarnished images

This year's Belfast Festival begins with two plays offer- was completed relatively ing differing perspectives on icons and images: at the Lyric Theatre, David modern; its majestic stone Pownall's Getting The cavern is a setting in keep-Picture blends 19th-century Irish liberationism with photography, while St Anne's Cathedral hosts a production of Murder In The Cathedral which replaces the liturgical heart of T. S. Eliot's work with an arsenal of spasmodically

malfunctioning technical gewgaws. Pownall's play (produced in association with the Atlantic Bridges cultural

organisation) jumps off from the historical point in 1845, when, shortly before his death, the former American president, Andrew Jackson, sat for the pioneering photographer, Matthew Brady. With this, the playwright interweaves a visit from a young Ulster woman, intent on persuading Jackson to Repeal movement, and Jackson's negro housekeeper, who constantly petitions him to free from slavery his own children by her.

Will Hargreaves' design makes the play's motifs night - were the icing on visually explicit, ranging the mechanical cake. And I blank picture frames against opaque windows, acting. area with a huge frame within which are projected various photographic images, and through which young Sorcha Kinlock (Jasmin Russell) enters.

Jackson, the hero of the Anglo-American war of 30 years earlier, is an icon: his support for the O'Connellites would put pressure on the British, his daguerreotyped image in Brady's New York window brings in extra custom - but how can the image of such a liberator be reconciled with Jackson's continuing and unylelding status as a Ten-

nessee slave-owner? Eoin O'Callaghan's production does not falter at Pownall's sporadic overwriting, either of lines or plot. Chris Crooks rumbles nicely as the elder statesman, and if Micéal McBrian is a little monochrome as Brady (playing the accent more than the lines), Russell moves confidently beyond her early principal-boyish-

Although its construction recently, St Anne's Catheing with the high-Anglican stateliness of Murder in The Cathedral - Eliot had, after all, written his dramatisation of the martyrdom of Thomas Becket for performance in Canterbury Cathe-

All things considered, then, it may not have been advisable for director Michael Poynor to stand his principal actors on mobile tubular-steel pulpits to be wheeled around by cowled, white-masked supernumeraries. Nor, having made that decision, to be unable to afford or accommodate enough of these monstrosities, so that some of the actors have to be left out of climactic confrontation scenes; nor to affix thereto badly-focused lights, throw his public support which inconsistently illumi-behind Daniel O'Connell's nate either the actors' which inconsistently illumifaces or the cathedral's

The similarly malfuncwhich caused one performer to corpse on Wednesday haven't even mentioned the

make the point that this story of Becket is removed from modern religious experience, or that those who propel the action are not the antagonists we see immediately before us. Alternatively, he may have believed that this ridiculous gimmickry would be impressive in itself. Whichever interpretation may be true, he is sorely mistaken.

Ulster Theatre Company seems to contain elements of training, youth, amateursional work; however, nelther play nor Festival programme mentions this. Consequently, this production must be judged entirely by the standards of an international arts festival; by those standards, it is wo fully inadequate.

### Mutual surrender

Britain should take more practical steps to link its fate with the rest of Europe; just as France should now reconsider its studious distance from Nato

Winston Churchill's words resounded once more in Paris as his statue was unveiled last week by Queen Elizabeth and President Jacques Chirac of France. The rhetoric is familiar, even comforting, but behind the protocol and fine words the ambivalent feelings France and Britain hold for each other have not changed much in 50 years.

It was Churchill who also said that, given a choice between Europe and Le Grand Large (the Atlantic), he would choose the latter. But Churchill the realist would not have been surprised by the new direction of British foreign policy: destination Europe. Britain simply has no choice.

Whereas previous British governments cultivated a special relationship with Washington to increase their influence while maintaining a separate British identity not unlike France's strategy in Europe - today, the British have today started to see their distance from Europe as a useless and costly selfisolation mechanism again, not unlike the way the French bave come to view their qualified member ship of the North Atlantic Treaty Organisation.

The British can afford to stay out of Europe even less than the French can afford to stay out of Nato. It is in their strategic interest to be part of the euro and to be present at the re-creation and deepening of the Euro-

Of course, Tony Blair, the British prime minister, must consider the sensitivities of a public which has still to be prepared for such a revolu-

tionary change of identity. The French, for their part, are aware of the strategic evolution of Britain towards Europe even if they do not acknowledge one of its indirect consequences for them: that the more European Britain becomes, the closer France will have to move

what Europe should look like in 20 years' time, even if he has yet to deliver his own views and proposals.

The absence of concrete actions by Mr Blair's government is evident in its defence policy. Robin Cook, British foreign minister, may wish to introduce greater morality into Britain's relations with the world; he may even want a code of conduct for British weapons manufacturers and arms exporters, but very little seems to have been

man in power today to ask getting its defence industry his colleagues to imagine ready - that is, privatised to face the challenge of globalisation. British and German defence industrialists have found redeeming values in French tardiness.

Yet these legitimate but petty quarrels and recriminations should not hide an essential fact: Europe is changing, and Britain's evolution constitutes a decisive element of this structural ransformation. As Britain moves slowly

but irresistibly towards Europe, Germany is adopting a more "normal" stance

and national interest. Slowly, too, Germany is accepting the fact that power may mean military might and that the German army, for example, like

counterparts, may have to adopt an interventionist The French are also changing. They are adopting a different diplomatic stance towards the US and Nato.

A more European Britain a more nationalist Germany a slightly more Atlanticist France - these are the incredients for a more significant European presence in the world. Increasingly the three countries have more in common, and not only because they all have centre-left gov rnments

Europeans have been disillusioned so often in the past that it would be imprudent to celebrate these transformations too soon. But the parameters of Europe are lowly changing, as if the lederative shock of the euro were already manifesting itself even before Europe's single currency is kunci

These fundamental changes have not yet begun to influence the way Euroean governments "sell" Europe to their bome andiences. Governments are still promoting an essentially defensive message: Rurope today is protecting its citisens from the contagion effects of global financial chaos, just as it has success fully protected its citizens from possible threats in the past such as wars between France and Germany.ensured decades of peaceful coexistence among former world war foes.

This is a rather negative message, which is not in tune with the ambitions and world responsibilities of a reborn and enlarged EU that should be legitimately proud of its present and past per-

But for a continent that has experienced many self-inflicted tracedies in this century, this may be the only realistic message, at

### LETTERS TO THE EDITOR

### Government cannot take comfort from McKinsey

Sir, Samuel Brittan ("A lopsided debate". November 12) gives a guarded welcome to the recently published report by McKinsey, the management consultants, its British and French painting a depressing picture of UK productivity. But the government, which likes the eport, cannot take comfort

from his words. The message of the report is that the UK is way behind its main competitors in terms of output ner head and productivity. But does the government understand the figures on which this view is

In making cross-country comparisons, McKinsey has converted its figures at lower exchange rates than recent market ones. No wonder Britain comes out hadly. If McKinsey had used market rates and compared the UK with the whole of Germany (not just western Germany), there would not have been such an unfavour-

tiers is to be made, the government at local and figures must at least be converted to a realistic currency base and compare complete countries Ministers should study the

McKinsey Report more carefully. Even if its findings are accepted, the report does not offer much comfort for the It concludes that the main

reason for Britain's per-

ceived low productivity "lies in the effect of regulations governing product markets and land use on competitive behaviour, investment and pricing". Given the way ministers have praised the report, we

must ask accordingly when

the government is going to

sort out the very regulations which McKinsey blames for The government cannot shelter behind the idea that managements are responsi-

ble for land use restrictions.

If a valid comparison of like more planning permisoutput per head across fron- sion for new premises, but national level blocks them. is this government prepared to antagonise many in the electorate by granting more of the planning permission business wants? How would this square with their policy

of restricting development, protecting green areas, and favouring town centres against out-of-town developments? Nor can government

blame managements for "product market" restrictions. Some of these have been created by UK governments, and some come from Brussels. This government prides itself on having influence in Brussels. But when will its fine words translate into policy?

As McKinsey argues, the UK milk industry is hampered because farmers are not allowed to produce enough raw milk in Britain for domestic needs, the motor industry is protected Many managements would

with higher prices, and regulatory decisions in telecommunications have kept calcharges much higher than it the US.

Is the government going to tackle all these problems? I doubt that the government will want to make the changes to land use planning and telecoms regulation that the McKinsey report recommends. I do not suppose they can persuade our partners in Europe to abolish milk quotas or other restrictions on the UK's trade with its continental

European partners. Some UK companies are world leaders. Others could do better. There is no case to denigrate industry as whole, especially after the profound transformation under conservative policies

John Redwood shadow secretary of state for trade and industry,

### Stick with common sense till the oil and water mix

From Mr Michael Pearce. Sir. It seems onite extraordinary that your leader of two-step", should be exhorting the government to declare itself fully committed to taking Britain into the single currency and give up the hard-won "wait and see" option; two days later, with

"The European blame game"

(November 5), it gives us five extremely good reasons for doubting the political and financial responsible, and therefore the argument for joining. We can (indeed should) all

applaud the concept of a single currency in ideal conditions, but those conditions can come about only after the appropriate economic, fiscal, industrial and social policies have been identified and enacted. We are a very long way from this Utopia, Surely even the FT, a longtime supporter of the single European currency ideal, must agree that until we can see clearly that the oil and water of European econom-

ics and politics can be made

to cohere, our government

sense and leave such a decision until we have seen the euro work over a full eco-

### ECONOMIC NOTEBOOK GILLIAN TETT

### Financial socialism, Japanese style

More government funds for cash-strapped banks will only delay the birth of a more competitive financial system

Peetal savings and Ministry of Finance tract femi

Bang" reforms? Judging from the government's recent antics, it might seem so.

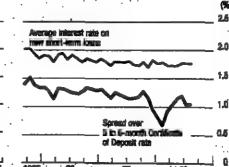

Two years after it pledged to liberalise its financial markets, Japan will this week take two striking measures designed to raise, rather than lower, the government's role in the banking world.

The first measure will be included in the Liberal Democratic Party's latest Y18,000bn (288bn) stimulus package, due to be formally unveiled today. Aside from the headline-grabbing tax cuts and public spending projects, at least Y5,000hn of public funds are believed to have been earmarked for the provision of cheap loans to the corporate sector. Already, Nissan Motors, the car group, is preparing to apply for a Y100bn from the Japan Development Bank, a

vernment entity. The second measure is less obvious. On Friday the Bank of Japan's independent policy board approved a new emergency lending programme, which will proba-bly start today. The operational details are complex. The bank will, for example, accept corporate bonds as collateral for loans to private banks for the first time. It will also expand its temporary purchases of commercial paper (short-term financ-

What these measures add up to is that the central bank will be pumping more money into private banks which pledge to lend the cash to their corporate clients, irrespective of credit risk. Meanwhile, the central bank is exposing itself to even more corporate risk by agreeing to hold corporate securities temporarily.

Neither of these measures is entirely novel. After all, the bank has already increased its provisions of yen liquidity during the last year. For example, it now disry in parts of the finan-holds about 40 per cent of clal system. Or, as one

paper after starting a CP repurchase scheme last year

liquidity.
The government has also lent to the corporate world for decades. As Jesper Koll, an economist, points out, the role played by the stateowned postal savings system and Trust Fund Bureau (a government body that lends out the postal saving funds to institutions such as the Japan Development Bank) has risen in recent years.

The measures to announced today are unlikely to be the last. The Export Import bank, another state institution, is considering extending \$36m in loans to cash-strapped Japanese corporations. More controversially, the ministry of finance has hinted it might use foreign exchange reserves to make dollar deposits at Japanese benks that are having difficulties raising non-yen funds in private capital markets.

New or not, such policies do not gell with the original Intentions of Japan's Big Bang. After all, what Big Bang was supposed to do was to reduce state involvement in the banking sector and encourage the growth of private capital markets. instead, the financial crisis of the past year has left the government not only with the role of regulator but as the most important interme-

quips, only half in jest: We are now inventing a type of financial

socialism in Japan, is this harmful for Japan's economy? Government officials say it not, since the measures are intended to be only temporary. After all, one reason for Japan's credit crunch is that banks have had to clean up their loan books to meet Big Bang's tightened capital adequacy standards. Extending state loans, government officials say, could avoid debilitating bankruptcies and help commercial banks restructure their balance sheets.

The officials add that pumping yen into the money markets will stabilise financial markets, eventually creating the conditions for broader banking reform A temporary bout of "financial socialism", they say, might be precisely what is needed to create a healthy free-market banking system in the future - and, more immediately, a stronger economy.

ut this logic carries potential problems. To begin with, it is difficult to believe that the recent measures will be "temporary", given the government's history of meddling and procrastina-

Shielding weak companies and weak banks from genuine market pressure is more likely to stave off badly outstanding commercial senior financial bureaucrat ing, than to promote rapid-

change. The measures are also unlikely to encourage the creation of a profitable lending business in a market dogged by overcapacity. As the Organisation for Economic Co-operation and Development has pointed out, bank lending margins have barely risen over the last year, in spite of the apparent credit squeeze (see

But the greatest danger is that these measures will simply leave the government holding more bad loans. The Bank of Japan and ministry of finance insist that "prudent" lending requirer are attached to funds being made available to private banks and companies.

But suspicion is growing that the Bank of Japan will not recover "temporary" loans extended to the failed Yamaichi Securities last year, for example. Meanwhile, the LDP's plans include the startling proviso that the Japan Development Bank must only lend to companies whose credit ratings are too low to raise private capital easily. In the short term, such

risks might seem minimal compared with the danger of a deepening recession. But pressures on public finances are growing. Unless the government can prove itself to be unusually competent now, postponing genuine financial competition today will only store up yet more

### Gambling on Brazil

The US administration and the fiscal stability and renewed International Monetary Fund growth, if market confidence is zil and, above all, on its ability to regain the confidence of pling interest-rate burden. domestic and foreign investors. Only then will interest rates fall to levels consistent with renewed growth Policy-makers are, in effect, playing a confi-

support over the next three years, roughly \$37bn is avail-able, if needed, in the next 12 far Congress and the states months. Of this the IMF is providing some \$18bn: \$9bn is to come from the World Bank and Inter-American Development. Bank; and \$14.5bn is from 20 countries, with the US contribu-

tion set at \$5bn.
In return for this boost to liquidity, Brazil is committed to achieving a primary budget surplus (balance, before interest) of 2.6 per cent of gross domestic product in 1999, 2.8 per cent in 2000 and 3 per cent in 2001. The over 3 per cent of GDP. But Brazil has rejected the idea of altering the exchange rate regime. Furthermore, private creditors are not being asked to contribute to the package.

Will this work? That depends on three things: confidence; policy performance; and growth. Despite recent declines, short term real interest rates in Bra-

not soon restored, the economy

The fiscal programme announced by the government is, by general consent, the most important determinant of confidence. Yet experience suggests dence game against markets. that such promises are not Of the \$41bn in international always kept - and are not even within the government's power The economy is already

expected to contract by I per cent next year - a decline in real income per head of 2-3 per cent. This is not surprising. The fiscal programme is contractionary, as are high interest rates. The defence of the exchange rate regime also precludes more than a modest boost from external demand Unless interest rates fall sharply, the recession is likely to be prolonged and unpopular. This will, in turn, make fiscal adjustment more difficult, further undermining confidence.

The bet taken by the lenders to Brazil is that a virtuous cir-cle of lower interest rates, policy success and renewed growth will now ensue. If what happens is the reverse, the package will surely collapse - and so will the reputations of those who bet on rll are running at well over 30 it. Both outcomes are readily per cent. Such high real rates of imaginable. The gamblers can interest are inconsistent with now only hope.

strewn with failures. During creating "financial supermarkets" were notoriously unsuc-cessful, although why they failed remains contentious. The unhappy experience of Dean Witter brokerage, which combined with the Discover credit card brand under the roof of Sears, the Speaker's task retail chain, suggests that a retailing environment was not appropriate for selling complicated financial products. American Express' ownership of the Shearson Lehman brokerage also

> Other industries provide few positive precedents. Companies in a position to attempt such a strategy, such as Unilever and Procter & Gemble, with their big stables of branded goods, tend to allow each brand to stand on its Express Financial Advisers own. They only benefit each other through shared distribution.

failed to deliver cross-selling's

In the 1990s, two new models have emerged for financial services. One involves a direct relationship with the customer, taking his specific needs as a starting point. The other is a manufacturing model, where a company tries to sell a range of its own products, usually in packaged form. Alex Oliver, of the New York-based consultancy Oliver Wyman, says Citigroup may well be "to some degree like the

Eric Speer, head of retail financial services group at Tillinghast Towers Perrin in New York believes the "relationship" model is most likely to work, because a financial advisor provides a service which is of value in itself. "There's a sense of a comprehensive look at the customer's needs and then the products become the fulfilment of those needs. It's not a manufacturing-based sale,

Financial Services, formerly part of the Travelers empire, has also cross-sold effectively, using finanassurer, Primerica relies on an 80,000-strong salesforce, who sell the old-fashioned way, sitting down with clients in their kitchens and talking through their

Primerica accounted for half of

the same cross-selling culture in its Citibank retail branch network. Already, bank branches are offering annuities under written by Travelers. Holders of Citibank credit cards have been offered Travelers motor insurance, and all those who bits will

be offered home insurance. In Las Vegas and Atlanta, Citigroup is attempting a more ambitious plan. The heart of the project will see branch employees offering Primerica's "Financial Needs Analysis" to Citibank clients, while sales representatives from Primerica will attempt to sell Citibenk cheque accounts.

Will it work? A big problem for Citigroup is that cross-selling tends to become more difficult as organisations grow larger. Even Mr Plumeri admits that the kind of marketing techniques he implemented so successfully requires a tightly-

knit culture. One of the most effective sales organisations in the US is Fifth Third Bancorp, a large regional bank based in Cincinnati, It generates more revenue in proportion to its cost base than any other bank in the US, and achieves this largely through a sales system borrowed directly from life assurance.

Regular meetings are held where managers from all branches of the business have to stand up in front of the chief

executive and their peers to list the best new contacts they have made in a month, Colleagues can thus quickly find out whether they have a chance of selling one of their own products to these clients. Fifth Third has grown in size,

but never through a sudden and rapid expansion like that seen at Citigroup. Instead, it has extended steadily from southern Ohio into Indiana and Kentucky. Its chief executives are still able to attend sales meetings across the network in person. Nothing comparable is feasible for the far-flung Citigroup, with offices in more than 100 countries.

A further problem for crosssellers is that they are setting their faces against one of the dominant trends of the last decade: the growth of specialists, taking advantage of cheap financing from capital markets, and cheap distribution through tolifree telephone lines, direct mail, or the internet.

Credit cards and home equity loans have seen specialist direct marketers rise to prominence. Americans are now accustomed to treating these products as discrete stand-alone entities to be

shopped for separately.
Richard Kovacevich, chief executive of Wells Fargo, another enormous financial institution created by the merger of Norwest with Wells Fargo, suggests this means credit cards are an inappropriate vehicle for cross-selling. As chief executive of Norwest, a Minnesota bank formerly best known for its loans to the agricultural business, he decided against making any significant investments in credit cards (in contrast to Citigroup, which asues more credit cards than any other bank in the world).

instead, he set about creating a retail culture for the bank. It now has "stores" rather than "branches". When research suggested that current accounts and mortgages provided a strong basis for cross-selling, the bank's strategy changed accordingly.

By the time of the merger with Wells Fargo, Norwest had become the largest mortgage lender in the US so as to maximise cross-selling. It is one of the few successful examples of the "manufacturing" model of crossselling. On average, each household it served bought 3.71 prod-

ucts from the bank. When Norwest started monitor ing this number four years ago, it stood at just below 2.8. In other words, it would have managed to sell about 30 per cant mora products over that period, even without gaining any new customers.

This performance allowed it to muster the capital clout it needed ger and more powerful bank.

to buy Wells Fargo, a much big-Wells Faren's experience provides some powerful lessons for

Citigroup, and for other financial groups contemplating mergers. First, everyone in a company must be imbued with a culture of

cross-selling, and receive strong incentives for its success. Second. if cross-selling is made to work, the rewards can be spectacular. But size, and the ability to offer a broad rage of branded products, is not in itself a guarantee that customers will buy more products from one company. With so many choices, companies must convince their clients that they have the best product in each category of financial service, and not only the best overall package.

The best that can be said about the proposed US tobacco settlement is that, by pushing up the price of cigarettes from an average of \$2.05 a pack to about \$2.60, it may slightly reduce the number of cigarettes Americans smoke. Otherwise, there is little in the deal to praise or celebrate.

True, there are one or two sops to public health - a voluntary ban on outdoor advertising, and funds for anti-smoking cam-paigns - but one of the deal's many unappealing aspects is that it will result in a transfer of wealth from smokers, who tend to be among the poorest Americans, to lawyers, who are already among the richest.

It is worth recalling that the settlement came about not out of a desire to reduce smoking but because entrepreneurial trial lawyers, having repeatedly failed to persuade juries to award damages to sick smokers, were looking for new and more successful ways to tap into the cash generated by cigarette

Their inspiration was to sepsrate the issue of smoking from personal responsibility. They argued that, whoever was to blame when smokers became sick, it was certainly not state governments: so states should becompensated for the money they spent treating sick smokers under the Medicaid public health programme.

it was a clever approach. The argument would not necessarily have prevailed in the courts the states, after all, already tax were high enough, and the sheer scale of the litigation so great, that the tobacco companies con-

108th does rather better.

The sums involved are mind boggling. The 48 states that have not already reached out-of-court settlements will receive payments totalling \$206bn over 25 years - five times the size of the International Monetary Fund's rescue package for Brazil.

It is not yet clear what the lawyers' cut will be. But the costs will be passed on to smokers in the form of a surcharge - a tax in all but name - on the price of cigarettes.

It is a bizarre, and unsatisfactory, outcome. Smoking is an important public policy issue directly affecting the health of millions of people. Tobacco regulation and taxation are matters that citizens rightly expect their governments to address, not to be thrashed out by cadres of lawvers motivated by the pursuit

of profit. Congress tried and failed to resolve the tobacco issue this year. Perhaps this deal is the next best thing. But it is a sad indictment of the US political system that trial lawyers have started dictating public policy.

Eggs hit the spot The sturgeon fishermen of the former Soviet republics are getting a lesson in market

economics. Their best-known product, Beluga caviar, is much prized in New York by some estimates, more than half the 50 tons. imported to the US each year an consumed in the Big Apple. But as this autumn's catch begins to arrive on US shores, prices at the

dell counter are scaring. It is a classic tale of post-Soviet economics. Freed of the Soviet era's tight production limits, fishermen on the Casolan Sea - home to the most prized sturgeon - cast their nets with abandon and caviar prices

This couldn't last. The sturgeon, facing extinction through overtishing, was eventually eccoped up by the international convention that protects endangered species. Production limits were

reimposed - this time with International teeth. The US, a signatory to the convention, has just begun vetting the origin of caviar imports, even using random DNA tests to make sure the slimy eggs are not arriving se pretences. Prices for Beluga have jumped 20 per cent as a result, says Hossain Armaini, whose

of New York's top restaurants. The wholesale price can reach \$450 a pound and will jump again in the spring, when the last of the caviar imported under the old regime has been

As long as the benefit finds its way back to the producers, the sturgeon fishermen carı ponder on the old free market economists' nostrum: that there's nothing wrong with putting a product.

### Pastures new

European Union agriculture ministers are experiencing a serious bout of revolving door syndrome - eight have moved o since the early summer.

Some of the movers continue to be shakers elsewhere. The UK's Jack Cunningham has taken on the role of government "enforcer", France's Louis La Pensec has been elected to his country's senate, and Jozias Van Aartsen of the Netherlands is now foreign minister.

But three of them - Jochen Borchert of Germany, Annilos Almberg of Sweden, and Italy's Michele Pinto - lost their jobs following elections or changes of government. Fernando Gomes de Silva quit office in Portugal for health reasons, and Stephanos Tzpurnakas of Greece was a casualty of a government reshuffle

In fact, she said, she was looking forward to her next trip to Washington, so that she could make a beeline for Kenneth Starr, the man who spent millions embarrassing President Clinton in

said Rafidah.

the Lewinsky attair. But it wasn't to be a win for the home team. Albright

prison," before a thoughtful Malaysian technician could turn her microphone off.

### Newt work

As Newt Gingrich ponders a future outside politics, he might need something that pays well. The National Taxpayers Union says Gingrich will be eligible for an annual pension of just \$24,000 a year - a fraction of the \$120,000 a year Tom Foley, his predecessor as House speaker, pulled in.

It seems Gingrich initially spurned the Congressional pensions system after first being elected in 1979. By signing up only in 1989, he was victim of a 1985 change, partly at the behest of Republicans, to show Congress's commitment to cutting costs by making their own pensions less generous. Nice one Newt.

### Number crunch

Russig's financial institutions have come up with an intriguing new form of inflation since the central bank indicated last week that it had agreed to save 18 of the hundreds of near-bankrupt banks - those that were "socially and economically important". But it hasn't yet named the lucky few, and so far at least 20 have claimed that they're in the charmed circle. As so often with Russian banks, nothing quite

### Brazilian breather

The crisis is not over. The International Monetary Fund has learned some lessons over the past year. Its \$41bn support package to Brazil was carefully stage-managed to exceed expectations. And it is heavily front-loaded: \$9bn will be available immediately and \$37bn within 12 months. But the package still has some serious shortcomings. Rather than directly addressing Brazil's central problem - its excessive debt - the money will be used to shore up the government's foreign exchange reserves, to defend the real. Worse, there is no explicit "bail-in" of private creditors. Banks and investors have merely been put under political pressure to remain supportive by rolling over their credit

Everything depends, therefore, on the markets retaining their confidence. Brazil's total ratio of debt to gross domestic product is more than 50 per cent. The critical component is R\$250bn (\$220bn) of net domestic debt, most of it short term and attracting very high, floating interest rates. Two-thirds is held by domestic pension funds and thus tied to the local market. But that still leaves at least R\$85bn vulnerable to capital flight - enough to overwhelm the government's remaining \$42bn of hard currency reserves plus the

investors' confidence, in turn, depends on the speed and effectiveness with which the government enacts its fiscal austerity package. If that goes smoothly, interest rates can fall from their current 40 per cent, reducing the crippling budget deficit and keeping the economic fall-out to a minimum. But any political slippage over the next few months could have cata-

It may not have come to war (yet), but it is magnificent for the oil price. To judge from last week's fitful rally in the price of Brent crude, deteriorating relations with Iraq could be just what is needed to lift of from the \$13 dollar per barrel doldrums. Remember what happened in 1991/2, after all, when oil rose to \$40 per barrel after disruption to Iraqi and Kuwaiti production and exports. After a year of falling prices, followed by a deceptive short-lived rally in September, no oil trader wants to be caught the wrong side of a sudden

raily. Yet, unless events in Iraq turn very nasty indeed, it is hard to see much upside for the oil price. Any military strikes that are eventually launched are likely to be focused on a small number of military targets rather than centres of Iraqi oil production. And so far the United Nations' "oil for food" programme does not seem in danger, so there is little prospect of a reduction in global oil sup-

Furthermore, global oil stocks remain. high, representing 58 stock days against compliance with Organisation of Petroleum Exporting Countries-agreed production cuts has had precious little impact on stock levels, because of falling global demand. But a hard winter and soft economic landing in the US and UK should make inroads into stock levels and put upward pressure on prices. However, without a recovery in emerging-market demand, it is hard to envisage oil selling for more than \$16 per barrel in

Corporate South Africa, it seems, is intent on relocating. Billiton led the way, Anglo American is following, South African Breweries and Old Mutual back in the wings, and Sappi has achieved a New York listing. A more blue chip collection South Africa could not offer.

For London this is great news. There is the kudos of attracting some significant companies, not to mention the increase in

CONTENTS

shares traded and juicy raft of advisers

But for South Africa, a rush of top companies offshore hardly sends the right sort of message. Why are Brazil or Australia's finest not doing the same? Politics? Undeniably, this is the great unspoken factor South Africa's companies will not mention. But even if it is a factor, it is not the most important.

Apartheid warped South African business as much as it scarred its politics. Neither is quickly repaired, and the path to normality is not a smooth continuum. Wrenching measures are required, whether in the imperfect process of black economic empowerment or the equally jarring relocation effect as South African companies play globalisation

Companies such as Anglo American and South African Breweries have outgrown South Africa. If they are to grow, it must be outside South Africa. So long as exchange controls remain in place, that effectively requires relocation. There is also the question of an improved rating. Being listed abroad clearly broadens the investor base that can hold your stock. But will this bring a rerating? Not necessarily. The risk profile of the assets remains the same, as does the manage-

Indeed, relocating could backfire; greater analyst and investor attention car work both ways. And while South Africa has a fairly sophisticated investment community, the leap to London is a big one. Ask Billiton, a good company with good prospects, which has suffered a baptism by fire. Companies without a strong case for relocating should not bother with the

dapt, shareholders should benefit from being forced to operate more efficiently. The big loser will be the Johannesburg Stock Exchange, which will see liquidity drain away to London in some of its largest companies.

South Africa itself will need to plug some of the gaps with foreign investment. Certainly there will be a lot more assets up for grabs. If foreigners still choose to stay away, the outlook will be gloomy indeed. But the relocation process itself is no reason for gloom. It is a sign of normal-

### Europe outpaced by US on competition, says report

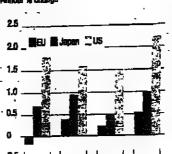

Europe lags behind the US on virtually all measures of competitiveness, according to a report that will make grim reading for EU industry ministers meeting in Brussels today.

The report highlights the Euronean Union's inability to create new jobs as quickly as the US and Japan, its poor response to innovation, a lack of risk capital and the high cost It was written for the European

Commission by a consortium of consultants from six EU countries, and will be presented to ministers as part of a general discussion on EU competitiveness. The report concludes that the

standard of living in the EU, measured as gross domestic product per capita, is 33 per cent lower than in the US and 13 per cent lower than in

One of the main reasons for this is the EU's failure to create new jobs by moving swiftly into promising new sectors. "Where the US has created jobs in technically advanced. industries and transformed itself into a service economy, Europe is ing behind," the report says. The report forms part of the con-

tinuing debate in Europe about how to cut record unemployment, and will strengthen the hand of those arguing for greater flexibility in labour markets and less regulation.

"In spite of the single market proramme and its effects on competition and liberalisation, Europe still has more restrictions and distortions of competition in service industries than the US," it says.

A similar report two years ago provoked a row inside the Commission between its non-interventionist camp, which argued that overprotected labour markets cost Observer, Page 17

defending Europe's social model.

Europe's poor employment performance is weaker not just in new high-tech industries, but across the board, say the report's authors. This suggests that Europe's problems lie in the general business environment rather than in the weak performance of individual branches

of the economy."

A lack of adequate risk capital. essential for high growth, in technology-oriented companies adds to Europe's employment problems. report argues that the competitive position of such companies in the EU is undermined by inefficientlypriced financial services and restricted access to capital markets, It concludes by saying EU govern-

ments should: eliminate institutional and regu latory barriers;

ensure continuous upgrading of European industry; move away from targeting individual industries with subsidies or

strategic trade arranger diffuse best practice - the report uncovered huge disparities in labour productivity in the EU.

### Attempts at Apec deal collapse as Japan resists tariff cut calls

By Peter Montagnon and Shella McKufty in Kuala Lumpur

Attempts to forge a trade liberalisation deal dissolved in acrimony at the 21-member Asia-Pacific summit as Japan and the US exchanged angry accusations. The trade ministers yesterday

lecided instead to send the package of proposals to the World Trade Organisation for negotiation. Dogged by political tansions and enfeebled by US President Bill Clinton's last-minute decision to stay away, the Asia Pacific Economic

talks in Kuala Lumpur were widely resarded as a disappointment. After Japan continued to resist pressure from the US and other industrial countries to cut tariffs on forestry and fisheries as part of a voluntary trade liberalisation packagreed to transfer the package to the

The decision was taken after what Sergio Marchi, Canadian trade minister, described as "very difficult discussions". The tariffs deal was intended to be the centrepiece of this year's annual meeting of 20 Asia-Pacific countries plus Hong Kong.

There are fears that US-Japanese relations may deteriorate as a result of the exchanges, which were marked by angry outbursts from Charlene Barsheisky, US trade remsentative.

In an unusual departure from nor-Co-operation (Apec) forum's trade mal diplomatic language, a Japanese official openly described US accusations that Japan was conducting cheque-book diplomacy as "evil" and "defamation".

The US case was weakened by Mr Clinton's decision to stay at home to deel with the crisis in the Guif.

gioss on it," said Mr Marchi.

Ms Barshefsky sought to put a brave face on the outcome, saying that the liberalisation programme would have had to pass through the WTO anyway. A pattern had been established that should allow global liberalisation to proceed along the lines already established by Apec with its earlier deal on information technology. "This is a very significant outcome," she said.

"We are pleased that the principle voluntarism is respected," said Mikie Kiyoi of the Japanese foreign

Other Asian participants said the decision was a realistic compromise. "Apec still has momentum." said Surin Pitsuwan, Thailand's foreign

introducing the MSCI Fixed income Indices\*

sovereign debt index euro credit index

Today, MSCI launches two new families of indices covering global fixed income markets.

The MSCI Sovereign Debt Index presents comprehensive coverage of the global government debt market. Euro-denominated government and credit markets are represented by the MSCI Euro Credit Index which complements our recently introduced EMU equity indices.

With market pricing, on-line delivery of information, full coverage of institutional markets and 24-hour client support, these new indices are an invaluable resource for investment professionals worldwide.

### Asian headache not over

denominated bond market.

Most of us have been through it. The party where the wine is flowing and caution is sbandoned; the dreadful hangover in the morning and the vow never to over-indulge again. But only a few weeks later, it is Friday night and your friends are urging you to Asian markets represent the

potentially lethal beverage of the moment. For years they represented many investors' exotic tipple of choice, thanks to a combination of rapid growth, low inflation, stable politics and financial reform. instead of headaches, they brought a refreshing pick-me-up to portfolios.

The pristine reputation of the region ensured that the distillusionment that followed the Thai baht devaluation in 1997, and the subsequent financial turmoil in Asia, was all the greater. It seemed as if many investors might never touch the region again.

But just look at the figures. The Indonesian market was up 64 per cent in dollar terms in October this year, Bangkok 60 per cent, Manila 48 per cent, Singapore 40 per cent and Hong Kong 32 per cent. While those rebounds reclaimed only a fraction of the previous losses they are even so the sort of gains investors normally cannot afford to ignore. But analysts remain sceptical, arguing that it has

been a trading rally rather

long-term money piling into to

the market. After all, investors

were caught out in the first

than a genuine case of

jumped more than 80 per cent as investors assumed that, with International Monetary Fund rescue packages in place, the economies would enjoy the kind of V-shaped recovery seen in Mexico in the mid-1990s. But the picture looks much bleaker this time. After severe recessions in most countries this year, the mean forecast for Hong Kong and Indonesia

Economics, is for a 2.8 per cent drop in gross domestic product next year: for Malaysia, a 0.5 per cent decline; and for Thailand, 0.5 per cent. Singapore and South Korea are rises. These figures would be bad enough for a developed economy, used to 2-2.5 per cent trend growth; they will be south-east Asia, where 6-8 per

cent annual growth was the

according to Consensus

recent norm. And the slowdown in the developed world makes the task of Asian economies even harder. Everyone is rooting for an export-led recovery, but export to whom? Not Japan, which continues in the doldrums, and not Europe, where growth forecasts for 1999 are being rapidly scaled back. An even bigger issue is the scale of the financial restructuring needed across the region, of which the six-month debt moratorium announced by Thai Oil was only a foretaste. According to ING Barings, the Thai

corporate sector has a

debi-to-equity ratio of 168 per

universe of Asian corporations have serious solvency problems and that the majority of Asian banks have negative book values. Where is the capital to come

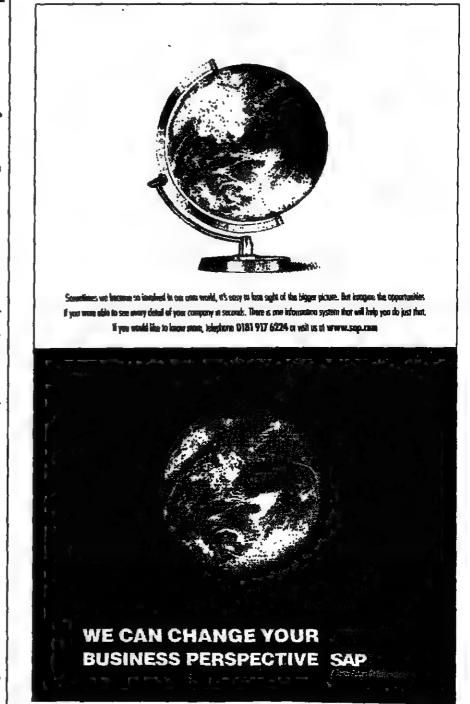

from to fill these holes? Spreads on emerging market bonds have come down a bit from the panic levels recorded earlier, but so far there has been virtually no issuance from Asian corporates or banks. Equity investors are far more eager to liquidate existing positions than to snap up new issues, and the region has so far shown a reluctance to sell businesses outright to foreign corporates.

Throw in the failure of Asia

so far to deal with one of its other problems - industrial overcapacity - and one can appreciate that it will be a long time before the region's recuneration will be complete At least the risk of a

hangover may be getting smaller with each lurch of the cycle. As ING Barings points out, valuations are more moderate this time round. Only China and Malaysia have historic price earnings ratios above those prevailing in the first quarter of 1996. In terms of price to-book (or asset) ratios, only China is above its 1998 first-quarter high But valuation measures

matter for little when confidence in the region (and in the quality of the earnings and assets on which the valuations are based) is shot to pieces. Most investors are likely to "just say no" this

INTERNET FINANCIAL CONGLOMERATE LAUNCHES CROSS-SELLING VENTURE

### Citigroup targets web-site sales

Citigroup, the financial conglomerate formed by last month's merger of Citicorp with Travelers Group, is developing plans to cross-sell its different products online, using a marketing model borrowed from computer and software companies.

Ed Horowitz, head of the e-Citi support group, which is aimed at developing online strategy across the company, drew an analogy with sales of computers or web-sites, which often use one brand to support one phone call

"The aspiration is that if it says 'Inside Citi', it's going to work." he said. "If I say I have a financial investment product brought to you by Citi, powered by Salomon Smith Barney, you get both brands in front of the customer, and we will position - have come under closer those brands according to scrutiny since the announcewhat the customer needs.

concept is common. It pro- ment banks two weeks ago. vides a level of assurance. If This left many analysts it says 'Citi Inside' you are believing that its best assured that what's being chances for raising sales in presented to you on the the short term lay on the product side is what it's consumer side.

### COMMENT

### A bond but no bonding

When will Europe's businessmen learn? If they want to do blockbuster deals, they have to reckon with the might of Karel Van Miert, competition commissioner. British Airways, and now it seems Formula One, have proved miserable political operators in Brussels. Formula One may yet be the luckier of the two, but not by being the more savy.

Claiming that a commission investigation had left a "few minor issues" on the table smacks of arrogance. But For mula One needs only the market's approval, not Mr van Miert's, to get its \$2bn Eurobond issue away.

What price investors will exact for taking on the risk of an angry commission is anyone's guess. It could be large, though, if investors fear that the cashflows that back the bonds could be affected by a commission ruling, such as insisting on much shorter television contracts. The bonds are also planned to be redeemed from the proceeds of an initial public offering, the prospects for which cannot have

#### UK IT sector

The speculative juices are flowing across the Atlantic, information recincions as frothy internet initial public offerings return to favour. But in the UK, the mood is one of fretful watchfulness. The IT rally post its October plunge is fragile. This does not undermine the long-term bull case for the sector across Europe. Europe spends nearly half what the US does on IT as a percentage of gross domestic product, so the scope for catch-up is substantial. The severe falls in UK IT stocks owe more to

concern over valuations than fears over industry growth. Most companies are still seeing no evidence of a sharp downturn in sales. Of course, the fear is that their ability to forecast earnings is limited. And some software product companies have indeed been badly caught out by a dramatic slowing or deferral of orders. Service companies, however, such as CMG, Logica and Sema - which dominate the UK index - are cushioned by longer outsourcing contracts, which are less vulnerable to a sudden squeeze on budgets.

120

But the market's severe downgrading has been salutary in correcting an unsustainable anomaly; that of European ser vice companies trading on chunky premiums to their US peers. Some scarcity value was warranted, but not premiums of up to 40 per cent. The UK IT party is over for the moment, but not the hangover.

### **Short list of** Coral bidders

By Virginia Marsis

Ladbroke, the UK gaming and hotel group, is this week expected to inform prospective buyers of the Coral betting-shop chain which of them have been short-listed. Among those understood to have entered indicative offers for the 833-shop chain are the Tote, the pool betting operation, Stanley Leisure. the betting and casinos group, and several venture capital outfits. Ladbroke acquired Coral from Bass are in the £300m-£400m last New Year's Eve for rungs.

blocked on monopoly grounds. Ladbroke - which has until March 23 to sell the business - is the UK's largest betting-shop operator.

It had hoped to avoid a monopoly referral by agreeing to sell 133 Coral shops immediately to the Tote deal that has now been canbelieved to have cleared the Tota, which is state-owned, to make a bid for the entire chain. It is thought that bids

### Racing demon with all the cards

A Financial Times-Panorama investigation reveals how the men who run world motor sport missed out on millions. Patrick Harverson and John Griffiths report

Bernie Ecclestone, the blue-blazered, elderly admin-controlled by Mr McNally, buy anything in the world, as long as you're prepared to

pay too much for it." The theory has stood him in good stead over the decades as the former usedcar dealer from Suffolk built a hugely profitable empire around his F1 interests. emerging as the dominant figure in the glamorous world of Grand Prix racing.

His willingness to take big financial risks, and his ability to extract maximum advantage from almost every deal he negotiates, have and Mr Ecclestone. made him one of the richest and most powerful people in

world sport. However, Mr Ecclesione's business skills will be put to when his bankers begin merketing a \$2bn Eurobond issue designed to secure the financial future of the Ecclestone family and pave the way for the eventual flotation of his Formula One Holdings company.

Persuading investors to buy the bonds in the middle of a Suropean Commission inquiry into alleged restrictive practices in Formula One is also a big risk.

The Commission's competition authorities have made it clear they are far from satisfied with the complex He plumped for an annual financial arrangements between Mr Ecclestone and the Fédération Internationale de l'Automobile, motor sport's governing body.

Short list of

Commence of the Hottley

Count bidders

 $\overline{\gamma} \in \mathcal{C}^{-1}$ 

Chief among the contracts being looked at by the Commission is the 15-year agreement - renewable for incrative belevision and commercial rights worldwide.

A joint investigation of the contract by the Financial Times and Panorama, the BBC documentary programme, offers an intriguing . insight into how the business of F1 works.

what many believe amounts to an extraordinarily lopsided deal that cost the sport's governing body millions of dollars. It also made

a fortune for a former marketing director for the Marlboro cigarette brand and The story begins in 1987 with the signing of the sec-

ond so-called Concorde Agreement, the contract that defines commercial and sporting relations between the FIA, the racing teams Under the 1987 agreement

it was agreed for the first time that the FIA would receive 30 per cent of F1's television revenues in return a serious test this week for leasing the sport's commercial rights to Mr Ecclestone for five years.

At the time, the money from TV was relatively modest, and the FIA's income from its 30 per cent share was less than \$1m a year. By 1990, the collapse of

Canal 5, the television company that broadcast P1 in Prance, had made Jean-Marie Balestre, then president of the FIA, extremely nervous about the future of TV income and the value of the FIA's 30 per cent cut. Mr Bulestre switched tack

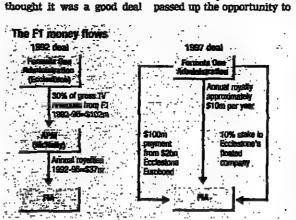

royalty for FIA, rather than a percentage of increasingly unpredictable revenue flows. But instead of negotiating a new deal with Mr Ecclestone, the man who brokered all of F1's TV contracts, he turned to Patrick McNelly.

Mr Balestre – an aloof, another 10 years until 2020 - mercurial figure - had little between the FIA and Mr in common with the rough Ecclestone. This deal grants diamond Mr Ecclestone. He the F1 promoter the right to felt more comfortable with market the sport's highly Mr McNally, a UK businessman and long-time associate of Mr Ecclestone who had left his job at Marlboro to run a business handling advertising hoardings and hospitality facilities at F1

diminutive 68-year-old millionaire who controls formula One motor vacing has

Based on figures provided by one of the F1 racing "He [McNally] certainly teams, the royalty payments are believed to have started made a great deal of money at \$5.6m in 1992, rising to just over \$9m by 1996.

from somewhere, because he's a lot richer now than he At the time Mr Balestre Asked why Mr Balestre

for the FIA: Mr McNally was the risk that TV revenues would collapse. Yet the contract turned out to be anything but favourable for the sports governing body.

Instead of shrinking, F1's TV revenues sourced as not a fixed sum in france, flashy and exciting sport giving him several times the that millions worldwide biggest income he'd ever flashy and exciting sport watched on television.

Between 1992 and 1996, TV Ecclestone are said by an F1 team owner to have totalled \$341m, with 30 per cent going to APM. The FIA is said to have received just \$87m from APM, so APM made a profit of some \$65m, according to figures provided by the F1 team.

Neither Mr Balestre - now in his 80s and still working for the French national automobile association - nor Mr McNally were available for comment on the deal.

However, Max Mosley. who ousted Mr Balestre as PIA president in 1993, admits the arrangement was hugely Under the deal, the FIA favourable to Mr McNally sold to Allsop Parker & and that senior FIA officials It is a story of how the Marsh, an Irish company were unkappy about it.

revenues, Mr Mosley said Mr Balestre could not have known they were going to elimb so sharply.

"He was always a great essimist. He hated getting a percentage in dollars, and motor racing took off as a and McNally was already got," he said.

By 1995, Mr Mosley was revenues raised by Mr keen to renegotiate a more favourable deal for when the old Concorde Agreement ended in 1996. This time he was not going to involve Mr McNally's company, but deal directly with Mr Ecclestone, with whom he would draw up a new contract, the F1 Agreement, on revenue distribution separate from the Concorde deal.

On the face of it, the deal Mr Mosley initially negotiated in 1995 with the F1 chief for 1997-2001 looked just as unfavourable as Mr Balestre's. This was because he, too, opted for an annual royalty rather than a percentage of the TV take.

Thus, in 1997 the FIA received a payment similar

to the \$9m it received in 1996. By contrast, a 30 per cent share would have mula One motor racing, has razor-sharp, risk-taking receive from APM an annual sums of money Mr Balestre earned about \$67m in 1997 a simple motto: "You can entrepreneur, but produced fixed royalty.

APM an annual had negotiated away to on gross television revenues that negotiated away to on gross television revenues that negotiated away to one gross television revenues the APM. As Mr Mosley puts it: estimated by industry experts of about \$225m.

With TV income rising steadily, the FIA could have expected to receive another \$250m or more over the remaining four years of the F1 Agreement up to 2001. Instead, the FIA stands to earn only another \$40m from the annual royalty over the

final four years of the deal. So how does Mr Mosley defend his deal? The answer lies in Mr Ecclestone's plans to float his FI business.

When the plans became public in 1997, bankers valued the company at about \$3bn. Immediately, Mr Mosley spotted an opportunity to renegotiate the original revenue-sharing agreement with F1 and to secure the financial future of the FIA.

He thought he had done that by persuading Mr Ecclestone to grant the FIA a 10 per cent stake in the

When the flotation was delayed, Mr Ecclestone's bankers came up with the idea of a \$2bn Eurobond issue. Mr Mosley moved quickly again, securing an agreement from the Pl supremo that \$100m of the proceeds of his bond would go to the FIA, money that would eventually be repaid from the sale of the FIA's flotation stake.

Mr Mosley argues that the \$100m, plus the expectation of a much larger windfall when the Ecclestone business eventually floats, is the essential reason he did not pursue the option of retaining the 30 per cent share.

Besides, Mr Mosley argues that the FIA was no longer in a position to demand 30 per cent of the huge TV revenues generated by F1.

Any demand by the FIA for such a large share would have been challenged, either by Mr Reclestone or the racing teems. Asking for 30 per cent then would have been "fantasy land", Mr Mosley

There was another reason

You can buy anything in the world, as long as you're prepared to pay too much for it'

1997-98.

Market turmoil dampens Aegon forecast

Accon, the Dutch insurer, has subtly revised its profit forecast for the year, saying it now expected an increase in net earnings "approximat ing" 25 per cent. That was the qualifier the company had used until August, when it stressed it was upgrading its projection to "at least" a rise of that rate.

The group, which made net profits in 1997 of Fl 2.21bn (\$1.2bn), on Friday reported a 33 per cent boost it the nine month stage to Fi 1.99bn.

It acknowledged that volatile equity markets, a drop in interest rates, and a depreciation in the dollar and sterling against the guilder were all negative factors, but said their effect on earnings for the year would be limited.

The results for January-September were a shade helow the average of analysts' expectations. Shares in Aegon, which have strongly outperformed the Amsterfrom DM3.34bn to almost dam market this year. slipped 3.4 per cent on the news before recovering to pary gains of DM1.86bn comclose just 50 cents lower at pared with only DM255m in FI 182.50.

For the third quarter earnings were alone, FI 678m. That compares with Fl 594m in the same three months a year earlier, the first period to include a coniribution from the immerance operations bought from Providian in the US.

income from banking fell from Fl 60m to Fl 44m in the ter, reflecting the sale of FGH Bank in Germany.

Aegon, which is also seek ing to shed the Amsterdambased Bank Labouchera, at the weekend announced a reshape of its deal agreed in June with AOT, a market maker. To overcome regula tory objections, specialist share trading activities are to be held separately. The insurer will initially retain some 57 per cent of the merged AOT Labouchere.

Aegon is seeking to focus on life assurance and pensions. Premium income at F1 19.36bn was up 26 per 30 per cent higher at Fl 8.32bn. Aegon's account-ing policy on booking gains in equities means the "effect of short-term market volatility on investment income is

Media group 'in move for Springer'

By Frederick Stüdemann in Berlin

Bertelsmann, Europe's biggest media group, is reported to be close to finalising the acquisition of a majority stake in Springer Verlag, a scientific publisher, as part of a move to establish a commanding position in the specialist publishing sector alongside more established companies such as Reed Elsevier and Wolters Kluwer.

According to Der Spiegel magazine, Bertelsmann intends to acquire 85 per cent of privately held Springer for about DM1bn Heidelberg-based Springer, which publishes scientific,

technical and text educational books, is not related to Axel Springer Verlag, the newspaper and magazine Bertelsmann said it did

not want to make a comment on the report "at the present time".

Buying into Springer would roughly double the sales at Bertelsmann specialist publishing unit, which last year had a turnover of DM600m, and strengthen the group's plans to establish a joint-venture in this area with Havas of France.

A merger of the two compamies' specialist publishing interests would produce an organisation with sales in the region of DM2.2bn, making it the world's third

largest • Deutsche Telekom, the partially privatised German telecommunications company, has been given official clearance for a 15 per cent increase in monthly fees, announced last year, charged to users of its cable television network.

**NEWS DIGEST** 

TELEVISION

### Eastern European group suffers deepening losses

The financial crisis in Russia prompted multinational groups to cut back on advertising budgets, leading to deepening losses at Central European Media Enterprises, the troubled pioneer of privately owned commercial television in eastern Europe. Losses rose to \$35m in the third quarter of 1998, from \$18.8m a year earlier.

The company is facing serious financial problems in Poland and Hungary and warned that it could face writeoffs of up to \$80.7m on the value of its investments in Poland, if it were unable to resolve continuing conflicts with ITI, the Polish media group, over the running of TVN, their joint venture television network.

Ronald Lauder, one of the heirs to the Estée Lauder cosmetics fortune and controlling shareholder and nonexecutive chairman of CME, has been forced to provide additional equity capital to shore up the group's finances. He is to inject \$22.7m into CME through RSL Capital, his wholly owned company. He is subscribing to new stock at \$15 per share. In the past year CME shares have fallen from \$30 to about \$8.

CME is seeking to strengthen its finances further through a new \$25m credit line and through the sale of its 9.6 per cent stake in Mobil Rom, one of two mobile phone opera-tors in Romania. In Hungary CME is being forced to take heavy write-downs on programme rights, which it acquired last year, before it lost the tenders for two national broadcasting licences.

The write-down totalled \$3.66m in the third quarter following a write-down of \$10.96m in the second quarter. Further write-downs of \$12.2m are expected including \$4m in the fourth quarter and the balance in 1999 and 2000. The group suffered a net loss of \$88.7m in the first nine months compared with a loss of \$60.6m a year ago.

TELECOMMUNICATIONS

Optus price boosted

Strong interest from overseas investors in the flotation tomorrow of Cable and Wireless Optus, Australia's secondargest telecoms company, helped boost the final price to A\$2.15 per share, Optus said. This was at the top of the indicative range set for institutional bidding and 16 per cent higher than the \$1.85 a share paid by retail investors.

Optus, 52.8 per cent owned by Cable and Wireless of the UK, will list on the Australian Stock Exchange with a market capitalisation of A\$8bn (US\$5.1bn), putting it among Australia's 20 largest stocks. The relatively small size of the institutional book, with 375m shares, and the limited retail offer, was due to moves by C&W to subscribe for nearly half the shares being issued or sold, and the offer by Mayne Nickless, the Australian transport and healthcare group, of its 25 per cent Optus stake to its own shareholders at the \$1.85 retail price. Gwen Robinson, Sydney

Panafon sees strong demand

Greek retail investors are today expected to subscribe heavily to a public offering by Panafon, the first of Greece's three fast-growing mobile telephony operators to be listed. Roadshows in Europe and the US have triggered strong institutional demand and the price range for the price rang share. The final price will be set on November 19 after book-building is completed.

France Telecom has offered up to 38.4m shares, equivalent to 15 per cent of Panafon's equity, to Greek and international investors. The offering values Panafon at Dr1,200bn-Dr1,300bn (\$4.2bn-\$4.6bn). The sale will reduce the French operator's holding to 20 per cent. Vodafone of the UK will retain control with 55 per cent and intracom, the Greek telecoms equipment manufacturer, will keep its 10 per cent stake. Panafon has doubled its subacribers to 950,000 in the past year and claims a 56 per cent share of Greece's cellular market. Kerin Hope, Athens

**KDD** under pressure

Growing competition in Japan's telecoms market put pressure on KDD, the country's third largest operator, in the first half, but DDI, a larger competitor in the domestic market, was able to buck the trend. KDD's revenues from operations were down 6 per cent from Y153bn to Y144bn (\$1.2bn). Pre-tax profits before exceptionals fell 45 per cent from Y9.2bn to Y5.1bn, while net profits were down 52 per cent from Y4.5bn to Y2.1bn.

The former dominant international carrier blamed the downturn on liberalisation of the international leased line market and a lower accounting rate on traffic between the US and Japan. The accounting rate, which resulted in a drop in revenues of Y6.1bn, is the amount paid by one carrier to another carrier which brings in traffic from a for-

On the positive side, KDD's domestic service, which started in July, is expected to help support revenues in the second half. At the end of August, the service registered 1m calls a day. Competition is expected to continue to bite, with KDD's full-year pre-tax profits before exceptionais forecast to fall from Y16.8bn to Y9bn, and net profits to drop from Y8.5bn to Y5bn, on revenues up from Y316.4bn to Y329bn.

DOI, an affiliate of Kyocera, the high-tech ceramics manufacturer, reported group first-half revenues of Y618.7bn, a 6 per cent rise. Pre-tax profits before exceptionals amounted to Y41.3bn, up 4 per cent, and net profits more than tripled from Y4bn to Y15.5bn, mainly as a result of lower taxes. The company said results were affected by a fall in prices, which are forecast to cut full-year revenues by Y38bn. Michiyo Nakamoto, Tokyo

TRUCK MANUFACTURING

Isuzu in deficit

Isuzu Motor, Japan's leading manufacturer of trucks, said the country's recession and the Asian crisis forced it into its first interim deficit for four years. Analysts said the weak yen had prevented even heavier losses. The group, 37.4 per cent owned by General Motors, the world's largest manufacturer of motor vehicles, moved from pre-tax profits of Y8.73bn to losses of Y5.24bn (\$42.9m) on turnover down 18.5 per cent to Y467.97bn.

The heavy truck division, which relies heavily on manufacturing demand, suffered the largest decline, with domestic sales down 35 per cent to 22,850 units. This was slightly better than the industry as a whole: truck sales in Japan fell 38 per cent as manufacturers, facing collapsing demand and a deepening credit crunch, scaled back capital investment plans. Exports of light and heavy trucks, helped by the weak yen and brisk sales of its recreational vehicles, slipped 2.3 per cent to 114,669 units. Isuzu does

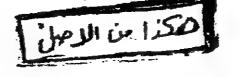

not sell passenger cars overseas.

The group, which calculated its results at a yen-dollar rate of Y126, said gains from the yen's weakness against the dollar were Y6bn in the first half. Last year, forex gains were Y10bn. Losses after taxes and exceptionals were Y2.33bn, in line with the company's forecasts. It

suspended its interim dividend. Analysts said the group had fared better than expected because of its product mix. "Isuzu's fortunes were better simply because they were not purely dependent on the heavy truck market," said Stephen Usher, industry analyst at Jardine Fleming in Tokyo.

Isuzu expects after-tax profits of Y1bn this year, on turnover of Y970bn. Alexandra Harney, Tokyo

Soners of Finland and Poland's TPSA were proof that IPOs can be completed even in relatively difficult markets, and there is no doubt that conditions now are more difficult than they Investor interest

strong nonetheless - the international tranche of Sonera attracted demand for 30 times as many shares as were being offered. Bankers said the sharp rebound in stock market lev-

els in the past few weeks had provided a window of opportunity for IPOs that had been waiting on the shelf since share prices Another hurdle for the began to slip in early autumn. They attributed the rebound chiefly to the US cut interest rates.

However, the rebound did not spread across the spec- downturn. NTT's issue, howtrum of IPOs in a European ever, will test a lot of weary market still dominated by investors.

issues that had the virtues Should the Fed hold on of liquidity and size had a interest rates on Tuesday, relatively smoother passage. The market is back for good tions that can offer liquid-ity," says Brad England of Merrill Lynch in London, which led the Sonera float.

> test of investor senti-Ament towards smaller companies comes this week with the start of a roadshow for Class Editori, a fast-growing Italian publishing group. It is offering up to \$85m worth of shares in a transaction that could value it at \$200m, and is one of the few Italian companies to seek a listing since the market downturn.

Bankers expect activity to drop off sharply again at the end of November, after when the timescale for launching an IPO is too short before the holiday period sets in. A lingering fear in the

markets, however, is the pos sibility that interest rates may not fall as much as investors expect between now and the end of the year, which could leave stock man kets vulnerable to another downturn

on two giant secondary offerings to be completed before the year end. France Telecom's FFr50bn (\$8.8bn) issue - part shares, part convertible bond - is already in the market, and is to be followed by the fourth tranche of Nippon Telephone & Telegraph.

NTT's will be a giant issue for a company that has never managed to win over investors. But the solid suc cess of the IPO for DoCoMo the Japanese mobile operator, should provide some comfort. That was the big gest ever IPO, carried out in the teeth of the market DaimlerChrysler to start trading the US, it will be no different

### Icelandic bank IPO oversubscribed

Chrysler's historic price;

By Ties Boxt in Etischische

The Icelandic government ailed the success of its privatisation programme at the weekend after an initial public offering in Icelandic Investment Bank, the stateowned commercial lender, vas four times subscribed.

Share subscriptions were cut back sharply after more than 10,700 investors – some I per cent of the total population - took part in the country's largest privatisation, involving 49 per cent of known in Iceland as FBA.

The government said it had received share applica-tions worth IKr18.9bn (\$269m), against IKr4.7hn of shares on offer. Total turnover on the Icelandic stock exchange, by comparison, was IKra.Sbn in the first 10 months of this year.

Heavy demand among private investors forced maximum subscriptions to be scaled back from IKr4.2m shares to just IKr504,000. The success of the offering has persuaded the government to earmark its remaining holding in FBA for dispose early next year.

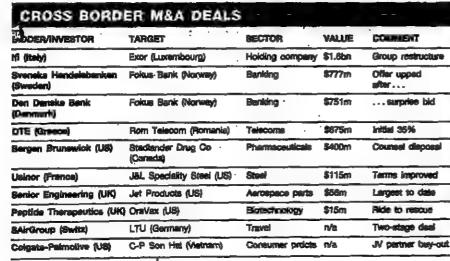

The privatisation follows a significant restructuring of the Icelandic financial services industry, dominated this year by the creation of FBA through the merger of four state credit funds: the Fisheries Investment Fund, Industrial Loan Fund, Industrial Development Fund and Export Credit Fund.

Most of the country's largest commercial banks have also been turned into limited liability institutions. The government, moreover, has reduced its controlling stake in Landsbanki, the national bank of Iceland, and 15 per cent of Bunadarbanki, the ing industrial projects and agricultural bank of Iceland. Venture capital, are forecast is due to be sold next month. to reach lkr735m this year In all, some 16 state-owned on net interest meome of institutions have been sold IKr1.17bn. under the privatisation pro-

### Sales for the third quarter 1998

The consolidated net sales of Usinor for the third quarter of 1998 amounted to FRF 16.7 billion compared to FRF 15.5 billion for the third quarter of 1997.

The increase on a comparable basis is 1.6%.

For the nine months ended September 30, 1998, the net consolidated sales amounted to FRF 54.8 billion or an increase of 6.7% compared to 1997 on a comparable basis.

in FRF millions	3rd quarter 1997	3rd quarter 1998	Change on a comparable basis
Flat Carbon Steels	8,777	3,775	+ 3.7%
Stainless Steels and Alloys	3,941	3,765	- 8.6%
Specialty Steels	3,131	3,520	+ 3.7%
Other Activities	169	-	-

Usinor	15,487	16,686	+ 1.6%

deconsolidation of Vallourec on June 30, 1997 and the change of consolidation of Forcast on December 31, 1997 to the equity method. For the third quarter 1998 Thainox (Thailand, Stainless Steel and Alloys) and La Magona (Italia, Flat Carbon Steels) are fully

The increase in net sales for the Flat Carbon Steels and Specialty Steels between the third quarter of 1997 and the third quarter of 1998 is due to both an increase in volumes (Flat Carbon Steels: + 2.5% and Spedalty Steels: + 2.6%) and In average selling prices (Flat Carbon Steels: +1.2% and Specialty Steels: + 1.1%).

The decrease in net sales for the Stainless Steels and Alloys results from a decrease in average selling prices, the volumes shipped remaining stable.

Despite a final demand which remains well oriented in Europe, the Group's activity for the fourth quarter is affected by the sharp increase of imports, notably in terms of selling prices.

EMERGING MARKETS CONGRESSIONAL RESULT PUTS RECOVERY ON HOLD AHEAD OF PRESIDENTIAL VOTE

### Equities falter on Chávez victory

By Raymond Collet in Caracas

Any hopes that the recovery seen by Venezuela's stock exchange in the past two months could be sustained faltered last week when the cent in dollar terms for the country's establishment was year to date. rocked by the sweeping vicleader Hugo Chaves in con-

Chavez, whose authoritarian per cent in four days. background and promise of radical political reform has sent investor confidence plunging, won nearly a third of congress, becoming the largest political force.

The showing has prompted fears that the leftist former paratrooper could become president of one of the most oil-rich countries.

The party of runner-up among the business community, Henrique Salas, won only 11 per cent of congressional seats. Also, the traditional parties appear unlikely to withdraw their Salas, despite their poor showing in the November 8 congressional elections.

With presidential elections away, "the market is react- of the elections, argues ing entirely to political Santander's Mr Molina.

events now", said one broker Venezuela based in Caracas, "and

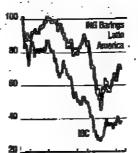

uncertainty reigns." The IBC index fell 8.3 per cent to 3.614.2 last week and is now down some 70 per

One of the principal losers tory of populist former coup in the most recent setback has been blue chin Electricgressional and gubernatorial idad de Caracas, the most traded share on the The alliance backing Mr exchange. It plummeted 17.7

> "Electricidad is the purest political play," says Boris Molina, an analyst with Santander Investment in Caracas. "It has the most to win and the most to lose in this upcoming election."

Indeed, the power sector is the most vulnerable to political change. Privatisation and tariff increases would be most likely put on hold under a Chávez government.
We are worried he could implement price controls and other populist measures

to meet the demands of his constituents," said Nancy Northrop, vice-president at candidates in support of Mr Alliance Capital, a New York-based investment fund. As a result, EdC could stage a dramatic comeback or remain in the doldrums, depending on the outcome

"It can still fall. There are still foreign institutional investors that could liquidate their positions in coming days," says Herman Sifontes at brokers Econ- as much as 50 per cent of oinvest. Benchmark yield curve. FRANKFURT Benchmark vield curve By Richard Waters 7,00 By Phillip Coggan 6.50 Will the Fed cut interest

the pull-back in stocks and Month ago bonds last week left the markets less vulnerable should the Fed decide to leave rates unchanged. The latest news on the domestic economy is probably not clear enough to offer a guide. Producer price figures, released on Friday. showed a 0.2 per cent corease last month but they

over the past 12 months. Consumer price figures, to be released tomorrow, are. expected to show a similar increase, with a rise of only 0.1 per cent excluding food and energy. The American consumer still seems to be in a buying mood, though - as surprisingly strong car sales. The condition of the financial markets is likely to

play a bigger part in the

markets have calmed and

still 0.7 per cent lower

rates again tomorrow?

Opinions on Wall Street

seem evenly divided, though

the stock market has rebounded, suggesting that there is far less need for

action. However, with the ink still dry on an international rescue plan for Brazil, inaction on rates at this stage might risk anothe jolt to the emerging markets, reviving the threat of financial contagion.

There have been gloomy from retailers, so the UK market is braced for another fall in the monthly sales numbers when the figures are released this week. Most of the FTSE 100 retail groups have seen their shares The slowdown should be

nother factor keeping the lid on inflation. Prices are expected to have dropped by 0.1 per cent in October, bringing the headline rate down to 3 per cent; the underlying rate is forecast to stay at the government target of 2.5 per cent. Although the Bank of England's inflation report

was released last week, some further clues as to its hinking should come from the release of the minutes of the Monetary Policy Committee meeting in November. The markets will be looking to see how many members backed the half percentage point rate cut.

- 13/11/98 6.00 . 5.50 \_ 5.00 4.50

However, the focus for UK investors this week will not be the domestic economy, They will be looking for the outcome of tomorrow's Federal Reserve Open Market Committee meeting. Sentiment is divided over whether the Fed will make its third interest rate cut of

5.75

Investors in German stocks hope positive signals from abroad will count for more this week than the less rosy nicture at home. Among factors supporting the narket are a growing belief that Japan may finally be tackling its deep-rooted financial problems and

devaluation. In addition, some analysts say there is room for another US interest rate cut when the Federal Reserve's Open Market Committee meets tomorrow.

dollar, which has recovered all its losses since the first US rate cut this year in late September, has helped share prices of export-dependent German companies. At home, the government's tax reforms continue to weigh on sentiment, because business will pick up most of the bill for the relief being offered to low-income

Benchmark yield curve

5.25 4.75 4.25 3.75 be able to avoid a currency

The recent strength of the

Corporate news will be dominated by nine-month results due tomorrow from life sciences group Hoechst, It has already warned that it will miss its profit target this year, Looking into December, many analysts think Frankfurt's Dax index could rise above 5,000 points again by Christmas.

TOKYO By Gillian Tett

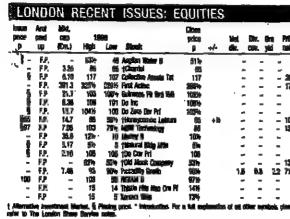

The government's plans for tax cuts are likely to be the main focus for the markets this week, as investors watch to see whether the ruling Liberal Democratic Party will offer any new measures to support the

ailing economy. Last Thursday the LDP unveiled a "draft" stimulus package of Y18,000bn of measures to be implemented in the coming months, that corporate and income tax cuts, additional public spending, and new loans to

the corporate sector. However, the Nikkei 225 the stock market index, fell after the news, as investors expressed disappointment that the package did not include a pledge to reverse the rise in consumption tax imposed last year,

On Friday shares rallied again, after rumours emerged that the LDP might have added this measure to the package, when it unveils the plans today. This left the

market closing at 14,288.21, If the LDP does produce further steps today, the rebound could be sustained. The recent rally has already left the Nikkei 225 above 14,000 for seven consecutive days - the longest period it has sustained these levels

CONTRACTS & TENDERS

### KINGDOM OF MOROCCO MINISTRY OF PUBLIC SECTOR AND PRIVATISATION

PRIVATISATION AUDITING OF THE TELECOMMUNICATIONS COMPANY Itissalat Al-Maghrib (IAM)

### TENDER OFFER

Within the frame of preparing the transfer of Itissalat Al-Maghrib (IAM) to the private sector, the Ministry of Public Sector and Privatisation, charged with implementing the transfers, offers for auditing by tender the telecommunications company "Itissalat Al-Maghrib", 1998 financial statements.

The present offer by tender is addressed to a grouping between Moroccan and foreign firms specialised in auditing and advising. The grouping will show solidarity whereby the auditing firms jointly assume responsibility for the final report. Accordingly, the auditing report must be signed by at least two foreign firms belonging to different networks and having a recognised signature at the international level. The offers will be presented in accordance with the tender documents.

The time allotted for completing the auditing mission is 4 months maximum, starting from December 1998, when works are expected to start.

All interested auditing firms or their duly authorized representatives may obtain the tender documents, available, in French, starting 16 November 1998 at the Ministry of Public Sector and Privatisation located at 47 Avenue Ibn Sina (first floor), Agdal, Rabat, Morocco. The tender documents could be also consulted at the Web Address of the Ministry site: http://www.minpriv.gov.ma.

The offers should be sent in a sealed envelope to the Ministry of Public Sector and Privatisation at the address mentioned above, at the very latest by 4 December 1998 at 18:00 pm local time.

### **British Steel** suffers from strength of sterling

COMPANIES DIARY

British Steel is the stock most vulnerable to sterling strength in the FTSE 100 index, so recent weakness in the pound will have given investors some cause for have come too late to influence this set of interims.

The recent Asian troubles will have taken their toll in the form of a fall in the price of steel in that region and an almost complete cessation of exports by British Steel to els of about 100p, the shares stand at about 15 times this year's earnings forecasts, well above its peer group of European steel companies BT Alex Brown expects a pre-tax result of £100m (\$166m), a fall of 30 per cent.

• Interim figures from Emap may be overshadowed by any comments the media and publishing company makes on prospects for the UK advertising market in coming months. Analysts will be looking particularly for signs of any downturn, although most seem to expect merely a slowing of growth. The company's consumer magazines business is seen as being particularly well placed as a barometer of consumer demand. The launch and closure of Telemax in France will hit the pre-tax line, but the underlying result is likely to be 11 per cent ahead, to £71m.

Telefónica, the Spanish telecommunications group, is expected to report nine month net profit after minorities of Pta163bn-Pta164.6bn (\$1.13bn-\$1.14bn), up from Pta141.8bn a year earlier, according to analysis' esti-

Strong revenue growth from the domestic mobile telephone business will continue to be the main driver behind higher earnings, but £14m and £18m. growth from its international unit is expected to be weaker because of the broad economic slowdown in Latin America, where the compa-

fixed-line telephony business is also expected to slow, reflecting rising competition.

### TUESDAY

at BOC is expected to have put in another robust performance, although this may have been undermined by the effects of currency translation, and the health care and vacuum businesses A consensus of analysts' forecasts from First Call, the

estimates service, suggests

they expect a result in the region of £385m, down from £415.2m last year. Turnover at Energis, the telecoms operator which floated last December, is

expected to improve to tween £115m and £118m for the first half, compared with £167.9m for the whole of last year. Interim earnings before interest, tax, depreciation and amortisation (Ebitda) should be between Analysts expect Northern

Foods to produce flat interim profits, as dilutive acquisitions and a slowing retail environment combine to leave the pre-tax line static

Recent figures from Marks tough times have arrived and Spencer exhibited a just as it has spent heavily slowing of food sales growth, and Northern Foods is unlikely to escape the

### WEDNESDAY

Hyder may take the opportunity at its interim forward its opinion on the recent comments from Ofwat, the water regulator. on the future pricing regime for the industry.

There may be some comments on dividend policy, in the wake of Anglian Water mentioning dividend rebasing. A pre-tax rise of 9 per cent to £115m is expected.

 Interim figures from National Power are likely to be affected by the end of the five-year coal deal, with its generous margins.

Nigel Hawkins at Williams focus on National Power's overseas initiatives, and any setbacks it may have encountered. He forecasts a pre-tax result of £225m, down from £254m.

 Safeway may become the latest retailer to suffer from weakening consumer

on marketing and supply chain improvements.

Analysis predict that the interim pre-tax line will fall, by some 16 per cent. Williams de Broë expects £192m, down from 2230m.

### THURSDAY

 Royal Nedlloyd is expect ted to report third-quarter net profit before exceptionals as low as F) 3m (\$1.57m). compared with Fi 31m a year earlier, according to analysts' forecasts.

Earnings per share are forecast to fall to Fl 0.13-FI 0.37 from FI 1.36. The results are expected to be hurt by the continuing poor performance of P&O Nedlloyd, in which Nedlloyd has a 50 per cent stake. AFX-News, Amsterday

### FRIDAY

 United Utilities is expec ted to produce a slight interim rise from £234m pretax to £240m, but investor interest is likely to focus on the impact of regulatory issues and the prospects for the dividend in the light of

### Germans braced for slowdown

### EUROPEAN OVERVIEW By Philip Coggan, Markets Editor

The health of the German economy still exercises the minds of European investors, with even the German

economics ministry admit-

ting last week that a slowdown was likely in the fourth quarter. The latest Ifo survey of business confidence, ket with an air strike on the third quarter but the released on Thursday, is Iraq, which might prompt overall level remains well likely to continue the down-

analysts forecast will continue its resistance to political pressure and leave interest rates unchanged when it lowing up the extensive plan announced by Siemens the prize to 2.485.78 while week before. And the

The European team at J.P. Morgan said: The pace of [merger and acquisition] deals in Europe slowed in investors to seek the safe above trend. In the first nine months of 1998, M&A volume

FTSE Actuaries Share Indices

gained 5.73 to 2,485.78 while the central bank across the planned merger between the broader Eurotop 300 fell Atlantic, instead, with many commentators hoping the reminded many of the scope Ebloc 100, comprising stocks

fell 0.47 to 889.38. Ian Scott, European strateare still undervalued relative to bonds. We need to see a full blown recession next year, or a sharp rise in bond yields, to justify the low val-

These transactions demonstrate how our expertise in international capital raising benefits our clients. The quality of our research and multi-currency execution capabilities position us at the forefront of the EURO market, whether for a debut issue, or the longest ever issue, or an innovative floating rate structure. It's what our clients across the globe have come to expect in the EURO market from Credit Suisse First Boston.

MONDAY 16

36

#### Agenda for reform

The Agenda 200 proposals to reform European Union agricultural spending and regional aid programmes form the main focus of a week-long session of the European Parliament, meeting in Strasbourg. Other issues on the agenda include the Court of Auditors' review of EU spending and the incidence of fraud, aid to help eastern European countries prepare for EU membership, social policy and proposed legislation to safeguard the continent's water sources.

#### Lafontaine's week

Oskar Lafontaine, Germany's finance minister, starts a week of bilateral meetings with international counterparts with a Franco-German economic and financial policy summit in Bonn. Since taking office last month Mr Lafontaine has attracted criticism with calls for greater international co-operation on unemployment and for closer co-ordination of currency policy. On Thursday he travels to Rome and London for meetings with the Italian and British finance ministers before flying to Washington for meetings on Friday with US Treasury secretary Robert Rubin, Federal Reserve chairman Alan Greenspan and James Wolfensohn, World Bank president.

#### Korean inspection bid

Charles Kartman, the US special envoy for Korean affairs, visits Seoul before flying to Pyongyang to discuss a possible inspection of North Korea's suspected underground nuclear facility.

#### Union meeting

Defence and foreign ministers representing member countries of the Western European Union meet for two days in Rome. Among items for discussion is the EU proposal for the creation of a defence and aerospace conglomerate capable of challenging big US groups in the field.

#### Apec summit

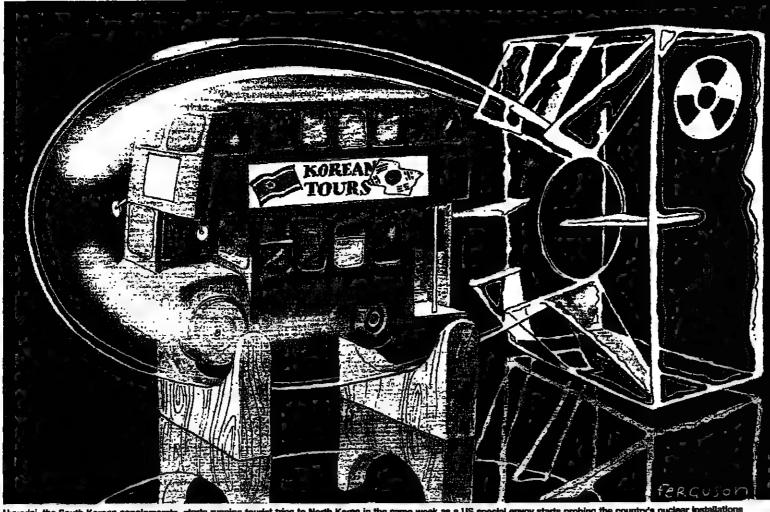

Asia-Pacific Economic Co-operation (Apec) is scheduled to hold an economic leaders' meeting in Kuala Lumpur, following its ministerial meeting at the weekend. Jieng Zemin, the Chinese president, is expected to make an "important" speech. The meeting is expected to confirm Russia Peru and Vietnam as new members.

### Chemical reactions

The Organisation for Prohibition of Chemical Weapons holds its third intergovernmental conference (to November 20) in The Hague. Ministers of countries that have ratified a ban on chemical weapons will be consider plans to destroy stockpiles.

### Aid clampdown

Industry ministers meet to discuss a new report on European competitiveness and aiterations to

Hyundai, the South Korean conglomerate, starts running tourist trips to North Korea in the same week as a US special envoy starts probing the country's nuclear installations

state aid rules. The Austrian presidency | Le Pen appeal will be hoping to win support for a regulation that will give the Commission power to recover Illegal state aid more swiftly.

#### Holidays

#### WEDNESDAY 18

### New speaker

The US House of Representatives is due to elect a new speaker in the wake of the resignation of Newt Gingrich. Bob Livingston, the Republican chairman of the House appropriations committee, appears likely to be the only candidate.

### Collector's gem

Christie's, the auction house, is due to auction in Geneva a diamond and ruby necklace designed and created for the wedding in 1874 of Tsar Alexander II's only daughter, Marie Alexandrovna, to the second son of Britain's Queen Victoria, Alfred.

#### Northern mission

Hyundai, the South Korean conglomerate, begins tourist trips to economically beleaguered communist North Korea. Preference for the first journeys has gone to older citizens who have not seen their home towns I the north since the country was divided in the early 1950s. Hyundal plans to eventually set up an industrial base in the north.

#### Layer on layer

States party to the Montreal protocol on protecting the ozone layer meet in Cairo (to November 24) to discuss what further action is needed to repair the destruction of atmospheric ozone. Though 80 per cent of ozone-depleting chemicals have already been phased out, largely due to action by industrialised countries, a full recovery of the ozone layer depends on developing countries playing their part. The meeting will also discuss amuggling of chlorofluorocarbons (CFCs), the main ozone-gobbler, and controls on new ozone-esting

There is little cause for Strains already evident, optimism, however, that official figures, gross domes-US under secretary for tic product grew at 7.2 per surplus with the US - which 8.8 per cent in the whole of

> Officials say that the 8 per cent growth target "guaranteed" this year by Zhu Rongil, the premier, can still be achieved. But many independant economists believe that the official statistics seem to overstate the real growth rate by several percentage points, making the appearance that China has achieved a "soft landing" this year somewhat illusory.

The international Mone tary Fund predicts GDP growth for China this year at 5.5 per cent, a figure more in line with the forecasts of many economists and anecdotal evidence from bankers and executives doing business in China.

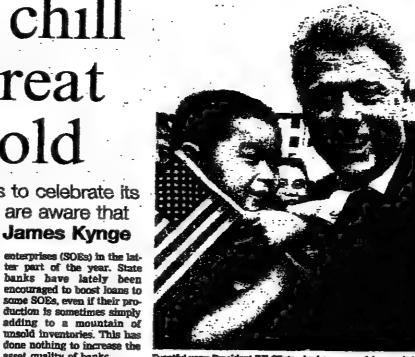

Whatever the exact growth rate, the problems that China faces are long term and structural. A deepening, 11-month deflationary trend caused by vast indusconsumer demand is at once the main cause and result of China's slowdown. Poor sales have prompted

price wars that have slashed profit margins, Reforms to a state-owned enterprise sector of more than 300,000 companies had led to closures and mass redundancies, further dampening consumer demand. Abundant harvests have also depressed the prices of some agricultural goods, hitting the incomes and spending power of 900m people in rural China. A vicious circle of declining prices, falling corporate prof-its and shumping wages has developed in some parts of the country. This has prompted the government to launch a large Keynesian forestall the real possibility

of social unrest. "China does not have a low-growth option," says Yukon Huang, head of the World Bank's representative office in Beiling, noting the social pressures that can arise from unemployment.

The package, launched in August, includes Rmb100bn support the infrastructure power, building materials and other heavy industrial products has begun to pick up, and official headline growth figures have received

a boost The imperative to create jobs and curb unemployment also appeared to delay

retail, real estate, building materials, steel and coal, are suffering from various degrees of overcapacity and equire little new foreign investment until

growth picks up. Recent restrictions on foreign business in the domestic telecoms, pharmaceutical, retail and insurance markets have raised questions over whether China's 'oven door" may be creaking closed. But officials insist that China has no intention of going back on the policy

Even without the new restrictions, foreign investment inflows were probably set to decline as bankers hit by Asla's crisis grew more wary of the region as a whole. Disquieting evidence of serious trouble in China's non-bank financial sector, as shown by the closure of the Trust and investment Corporation in October, has also made bankers nervous.

Trade has held up quite well this year but exports in

the country's economic cent, perhaps signalling transformation. tougher times to come. imports have also declined.

These challenges have made 1998 a testing year for the technocratic government of Mr Zhu, which was appointed at the National People's Congress (parliament) in March. But it has not been a year without significant domestic successes. A titanic, and, ultimately,

triumphant, struggle against the worst floods along the mighty Yangtze river since 1954 allowed the leadership and the People's Liberation

costs of financial sector Moody's, the credit rating businesses and act as a drag sands of staff will have to go. enhance regulation and

FOREIGN BANKS by James Harding

### Wake-up call to outsiders

The perception of China risk has worsened amid symptoms of the Asian disease

crisis and keep its economy insulated from the regional chill have counted for less and less with foreign bankers this year.

The retreat of Japanese lenders, who have withdrawn from China to tend troubles at home, and the hesitancy of western banks alarmed by the risks of lending in other emerging markets have created a liquidity squeeze that has exposed structural problems among Chinese borrowers. At the same time Belling

has moved to clean out the rot in many of its non-bank financial institutions. But, in the present jittery financial environment, this rectification has served to heighten the concern of international creditors about the safety of lending in China. Foreign banks, caught

between anxious credit com-

mittees back at head office and an activist governmentin Beijing, have adopted a defensive crouch. The costs of capital in China have risen, new lending is scarce and agreements to roll over loans have been cancelled. In short, the perception of China risk has worsened and China has started to show some of the symptoms

of the Asian disease Dong Tao, analyst at Crédit Suisse First Boston in Hong Kong, says: "In the past we have said that China would not be affected by the Asian crisis.

"The renminbl is closed on the capital account. But now we have seen there is one potential form of transmission of the Asian malaise, and that is through foreign

The closure last month of Guangdong International Trust and Investment Corporation (Gitic), a prominent investment company owned by the provincial government of southern China's prosperous province of Guangdong, sent a shudder through foreign banks.

International banks had lent more than \$2bn to Gitic. which as a state-backed company was thought too impor-tant to be allowed to fail, and roughly another \$10bn to similar interpational trust and investment corpora-

in recent weeks other trust and investment compa- changes to foreign bankers nies have defaulted on overseas loans, as foreign banks have called in credit fearing that Gitic might not be the last of China's 240 Ities to be shut down. International ratings agen-

cles have been falling over each other to downgrade the credit ratings for the trust and investment companies, which have been some of China's biggest borrowers 046000578

The Gitic closure, therefore, has served as a wake-up call to foreign banks and prompted a reassessment of credit risk

Wang Kuebing, president of the Bank of China, has noted a tightening of foreign credit in the immediate aftermath of the Gitic shutdown but says in the long term the closure should serve to instill discipline the Japanese banks from the among financial institutions, both Chinese and foreign.

"The closure of Gitic shows the Chinese government's determination to

China's claims that it could ensure stability in the finanstand apart from the Asian cial system," he says. But he adds: "Foreigners should learn some lessons."

The troubles in the nonbank financial sector have certainly focused foreign minds, overturning a couple of well-entrenched assumptions. One is that companies backed by provincial and municipal governments would not be allowed to fail and therefore represented quasi-sovereign risk. ... Another is that China will bail out foreign institutions

to protect its reputation. In fact, officials in Beijing have relished the chance to show reckless foreign lenders that they have learnt the moral hazard lesson of doing so. -Other Chinese government initiatives have further served to aggravate a foreign banking community made irritable by the concern over

Contraction

its bread-and-butter lending husiness. Moves to stiffen enforcement of foreign exchange controls have started to delay payments on letters of credit and disrupt many banks' trade finance operations. The implementation of a requirement to see customs documentation to prove that goods covered by

Since mid-September, Chi-

than 20 different notices and regulations, tightening the supervision of forez transactions and raising the requirements for official documentation, conversion and remittance on hard currency trummentions.

Taken together, says one western observer in Beiting, the measures represent "bigger road blocks at every conceivable currency conversion and remittance".

The tougher implementation of foreign exchange conperceived, capital flight," trols is symptomatic of the underlying concern in China about the stability of the currency, the scale of illegal flows of hard currency out of the country and hidden exchange debt.

But the measures are gen erating problems of their own. The stringent demands on the registration and processing of foreign archange transactions are clogging up the process of trade finance and delaying payments to commercial businesses both inside China and overseas.

The more exacting restrictions are now threatening to deter potential foreign investors, who are worried about the problems they may face in trying to remit hard currency earnings home. "The adverse impact on

trading companies, especially exporters into China, has been immediate," says Mr Howson. "But, going for ward, the enhanced enforcement will also have a serious impact on investment and hard currency financing.

The investment DITIAS DAVO not really woken up to the implications yet, but there are now very real constraints on the liberation of . foreign exchange for investment returns and debt ser-

In Shanghai the general manager of a large European trading company says: "Things are getting pretty difficult. The forez controls have had a huge impact on our business. We are finding it hard to swap renminbl into foreign currency."

shrinking fiscal base have started to cast a longer shadow China's tax collectors would eve you believe it has been The State Administration Taxation says industrial nd commercial tax income

in the first nine months of 1998 was RMB586.6bn, up 9.3 per cent from the same period last year, and in September alone it grew by 20.9 per cent year-on-year. But the government's energetic efforts this year to

reverse the long-term trend of collapsing fiscal revenues only serves to underline the anxiety that surrounds an acute shortage of state funds. Between 1978 and 1995 budgetary revenues have shrunk from 35 per cent of GDP to 11 per cent. This year the pressures

resulting from what has long been a shrinking fiscal base have started to cast a longer shadow. Tax has become a crucial ingredient in the outlook for state-owned enterprise reform, unemployment and growth as Beijing has come to rely increasingly heavily on its fiscal resources to lift a flagging ссопотку.

Liu Zhuo, deputy director unemployment but the real of the Research Institute of question is how long the Taxation Science under the State Administration of Taxation, said earlier this year: of these things "Ample fiscal revenue is vital to further state enterprise restructuring, relieve the pressure of re-employment, maintain the stability it is going to get very diffiof agricultural production and increase exports.

FARMING by Peter Montagnon

### Countryside dilemma

The more farmers are kept happy, the more unhappy trading partners will be

On the surface life seems ernment, at national and easy for a family of farmers sitting in the sunshine in the courtyard outside their house in hills near the southwestern city of

The sun is shining, crops are growing abundantly on the terraced hills and ducks are splashing happily in the nearby poud.

The underlying reality is a meat fetched more than opportunities for doing so. RMB8 a kilo, says Hang has gone down to between RMB5 and RMB6.

Inside the ramshackle living room of her house Mrs liang has a colour television these overall objectives. set and a video recorder. But because her son has a job in the city and her daughter works in an hotel in Shen-

With reform of state enterprises and a downturn in business facing the hotel trade, it is suddenly not so clear whether the children will continue to manage. Mrs Hang says her daughter may have to come home.

That could mean a loss of family income and one extra mouth to feed at a time when incomes are under pressure. It is the kind of worry facing many families in rural China in the wake of the economic slowdown.

For Beijing it is also a concern. With 900m people out of China's total population of 1.2bn living in rural areas, a sense of wellbeing in the national stability.

As the economy turns down, there is a fear that the countryside may have to absorb displaced workers from the cities, or at least that the cities will no longer offer employment opportuniplus rural labour.

All this is occurring at a time when farm incomes are growing at a rate of only around 1 per cent, below the national average.

It is thus not surprising that the government regards agriculture as a main priorbution system was made ity. Last month a government statement following a legislative review of farm policy made clear that the sector was a vital part of overall economic policy.

"Without stability in rural areas, there will be no stability in the country," it said. Without prosperity for farmers, there will be no prosperity for the Chinese."

But, apart from confirming the plan to allow farmers 30year leases on their land instead of 15-year agreements as before, the statement from the ruling Communist Party's central committee was vaguely in the long term. worded and contained little by way of new initiatives.

provincial level, is concerned about the need to provide enough food for the people.

incomes high enough to provide incentives to meet this objective. Close attention is paid to grain output and. although farmers have been tempted in recent years to diversify into more lucrative crops such as fruit and flowlittle different. Last year pig ers, regulations limit the

On the other hand the gov-Zihui. This year, thanks to a eroment has also been conglut in supplies, the price cerned to keep the price of food affordable to city dwellers. Two significant policy shifts this year illustrate how it is seeking to pursue

The first, which has the such luxury is possible only most immediate impact, concerns distribution. Traditiongovernment sought to keep retail food prices down and farm income up by buying from crop at guaranteed prices and then making the grain available to consumers in the cities at a lower, subsi

in the past three years - this year's grain output officially is expected to come in close to last year's 494m tonnes this system was no longer working. With silos overgovernment buyers unwill ing to purchase much grain. As a result it was being dumped in the cities at rock-bottom prices, fuelling the deflation in China's

Recently, therefore, a nev policy was introduced. Now the government effectively sets a floor price by agreeing to buy all available grain at a predetermined price.

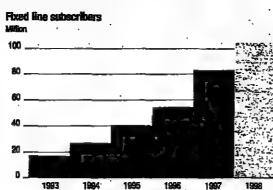

Responsibility for selling the grain on has been devolved down to provincial governors who are charged with the task of reselling it at prices that do not involve a loss. The aim is thus to reduce the burden of subsidies and to shift the benefit of government intervention away from city dwellers An overhaul of the distri-

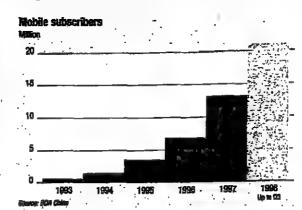

doubly necessary by recent revelations of corruption. press reported that an inves tigation into grain buying by

more than RMB80bn allocated for grain buying had disappeared into real estate speculation as well as the purchase of luxury items such as cars and mobile phones for officials.

How far the new arrange ments will prevent such mal practice is uncertain. West ern economists say it is also too early to say how the new distribution will affect prices

The more China tries to keep its farmers happy, the One reason, according to more unhappy many of its countries, the pressure to put the farmers first will almost certainly remain.

Lhey wouldn't have survived their migration if they couldn't have stopped at their feeding grounds;

> they couldn't have stopped if construction on a nearby power plant had scared them away;

> > the construction wouldn't have waited if not for the engineers of ABB.

Regulations on the opening up of the retail sector announced in 1992 required homes are equipped with a that pilot commercial joint ventures be approved by the State Council, China's cabinet, and that Chinese partners should hold at least 50 per cent of the shares in the

ast year in South Humber Bank, UK, one of the wonders of technology collided with one of the wonders of nature and something wonderful happened. Nature survived.

The largest combined cycle power plant in Europe was under construction.

Unfortunately, it was on a site adjacent to a feeding ground for migratory birds. Fortunately, the company doing the construction was ABB. You see, ABB is one company that's not only committed to the business of electric power generation, it's also committed

to the preservation of the environment. And it's a commitment that stretches from ABB's senior management all the way through to its subcontractors on the construction site.

Which is why during the months between September and March, construction on the plant, which might have alarmed the migrating birds and prevented them from feeding, was abruptly stopped.

The power plant, which is representative of modern power plant technology (highly efficient with minimal impact on the surrounding environment), was finished only after the birds had completed their annual migration through the area.

A fact that made English environmentalists very happy. Not to mention the birds.

### Reform reaches top level

Assessing the forces shaping Beijing's policy is no longer a question of reading one man's character

To describe China's new prehensive solution." government as technocratic is not remotely controversial Jiang Zemin, the president, was trained as an electrical engineer. So was Zhu Rongii, the premier.

In fact, of the seven members of the politburo's standing committee six are engineers and one studied architecture. This pattern repeats itself throughout the state council, or cabinet, and down through the minis-

Such an observation may appear humdrum, but in China it is anything but. The new government appointed in March cemented the transition from the type of char-ismatic leadership characterised by Deng Xiaoping, who died last year, to a new era in which decision-making has become less centralised. "As technocrats they are,

above all, problem solvers," says David Shambaugh, director of the Sigur Centre for Asian Studies at George Washington University.

They are not utopian ideologues, bent on remoulding society to their vision. They tend to perceive and tackle problems incrementally and in isolation rather than viewing issues systemically and looking for a com- chy but appears vastly out-

Socialist ideology and dogma appear to have virtually vanished from China's political arena.

Assessing the forces shaping Beijing's policy is no longer a question of reading one man's character. Against most expectations, a complex, collective leadership structure has emerged.

Mr Zhu has clear responsibility for the economy. Mr Jiang sets foreign policy with the help of Qian Qichen, a vice-premier and former foreign minister. Wu Yi, formerly foreign

trade minister, is responsible for overseeing trade policy and China's strategy to gain entry into the World Trade Wen Jiabao, a vice-premier and rising star, is charged with overseeing agriculture

and the reorganisation of the country's financial Wu Bangguo, another promising vice-premier, has been given the challenging

portfolio of guiding state enterprise reform. Li Peng, the former premier and a conservative, retains influence from his position as number two in the Communist Party hierar-

The transition of power from Mr Deng to Mr Jiang has been surprisingly smooth. But it would be premature to assume that significant tensions do not exist behind the composed exterior that China presents to the world.

Beijing is wrestling with enormous economic and social problems of a long-term and structural

Striking a balance between the need to attract foreign investment and the mounting pressure to protect sioned, observers said.

The issue of Taiwan could also test the new power nexus. Despite a recent improvement in the atmosphere across the Taiwan Strait, underlying bilateral strains are gathering strength. Taiwan's opposition Demo-

cratic Progressive Party. which favours indepen from Beijing, is expected to put up a strong showing in elections in December.

But for the time being an sionalism surrounds Mr

### Strategy for improved relationship with US

The issue of human rights is likely to continue to be contentious, even though the Chinese government signed the UN convention on human rights in October. But the most problematic area of all remains Taiwan

China's presence on the world stage has grown significantly over the past year. It has been praised for acting as a bulwark against financial turmoil in Asia, and in so doing has emerged as a regional economic power with elobal influence.

It has played a significant role as a permanent member of the United Nations Security Council in reacting, for mple, to nuclear tests by India and Pakistan.

Much work remains to be done on the state enterprises and on building incomes in the rural sector of the municipality which have been under pressure because Mr Wang says the munici-

juice plant, which will bring the farmers a more stable income. Peasants who are being

relocated because of the Three Gorges project are being given better quality housing and new opportuni ties, for example in pickle manufacture. With its underlying economic tensions, Chongqing

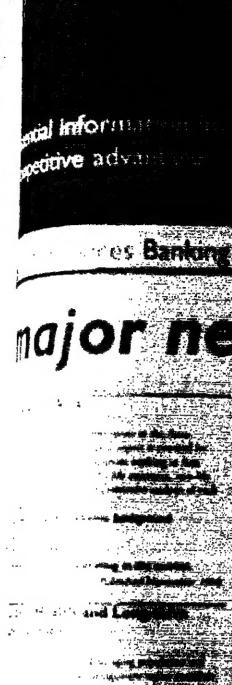

is one of those places where

China watchers fear the risk

of social unrest as old industries are wound down and expectations scaled back. In giving Chongqing its new status and allowing preferential treatment for foreign investment, the central government must be hoping it has also created an incentive for the municipality to create a dynamic economy that will spread wealth

through one of China's poorer regions. Whether it will succeed remains an open question against today's inauspicious economic backdrop.

But for both the city government and for Zhu Rongji, China's prime minister who Chongqing range from ABB the development of process- ity, this is an experiment exports. ble. . Chongqing range from ABB the development of process- ity, this is an experime it is an uphill struggle. Clustered round the revo- in power transformers to ing industries, including a that cannot afford to fail.

**Army in business** 

China Puty Gre

Before party bosses can slim down the defence forces, they must first liquidate much of 'PLA Inc' which has a sprawling commercial empire of roughly 20,000 enterprises

to the technopop beat at the Hotspot Disco in central Beljing. From the ceiling a couple of metal cages are lowered on ropes to reveal their "prisoners": young women in PVC doing a slow, writh-

Nothing about the establishment betrays that it is owned by the People's Liberation Army (PLA), which installed China's Communist Party in 1949. But it would hardly seem remarkable to most Chinese that the organisation responsible for the nation's security is engaged in such twilight business The fact is that the PLA is

one of China's biggest entrepreneurs. What began in the mid-1980s as a means of compensating for inadequate military budgets has burgeoned into a sprawling empire of roughly 20,000 about one-third of the military's operating expenses. "PLA Inc" had forged many joint ventures with foreign investors and was starting to invest overseas.

So it came as a considerable surprise when Jiang the president. ordered in July that the PLA (which also comprises the navy and air force) should quit business altogether.

The order, if it is carried through successfully, could rank as one of Mr Jiang's greatest achievements. The task be has set bimself amounts to nothing less than the repositioning of an organisation which wields immense political and commercial influence, and is often regarded as enjoying a status above the law.

In September last year, Mr Jiang appointed the first standing committee of the Communist Party's politburo that does not include a member of the military. He also announced plans to cut the 3m-strong armed forces by 500,000 as part of efforts to

ultimate goal of Mr Jiang's near Taiwan. Beijing's rival reforms is to foster an army defence, answerable to the laws of the state and not distracted by business.

General Fu Quanyou, head of the army's General Staff Department, talks of a "high-tech, modern" defence force.

The army must bold high the banner of opposing money worship, hedonism and extreme individualism and wage a resolute struggle against the negative phenomenon of corruption," the People's Liberation Army daily said in an editorial. Such aims might seem to

define minimum expectations for any army, but the realisation of them in China would mark a profound shift In the country's body politic. Separating the PLA from its business revenues would render it more dependent on the state budget and therefore diminish the political clout of top generals, anslysts say.

sure from the PLA prompted

point, too, the PLA's involvement in husiness has become counter-productive. The army, despite its roots as a self-sufficient guerilla force, has proven generally inept at civilian business. The current economic slowdown, especially in the state sector. has accentuated the PLA's shortcomings and strengthened arguments that it should quit comme

The Shenyang Aircraft Corporation, one of the top industrial complex, provides a relevant case study. The company's range of about 200 civilian products displays a dizzying disregard for synergy. It makes buses, jeeps, window frames, industrial filters, production lines for television manufacturofficial said in the summer

activities that caused Mr Jiane's patience But real questions remain over whether and how the

PLA can be removed from business. Barly signs have been encouraging. Sanjiu Enterprises Group, a pharmaceutical company with US\$1.2hn in assets, was in November in the process of being transferred to the control of the State Council (cabinet), executives said.

But it may be more difficult to bring firms such as Poly Group, the largest and most profitable of the PLA companies, under civilian control. Poly, headed by General He Ping, a on-in-law of the late Deng Xiaoping, is China's chief

It may turn out that PLA enterprises of an obviously military nature will be subsumed by the ministry of science, technology and indus-

Those of a primarily civilian nature would be more likely to be taken over by commission, a powerful state council body responsible for creating what China hopes will be internationally competitive corporations in the 21st century.

transfers has so far been kept secret, and it was not clear whether the government plans to pay the PLA directly for corporate

But one thing is clear, if the transfer is successful, the government will have to compensate the army for lost revenues - adding new strains to a government budget already hit by falling contributions from state owned enterprises.

The Hotspot disco, and other small and medium earnings, the PLA has sized ventures which account for 95 per cent of all PLA ventures, are expected to be sold off to any civilian

**POWER INDUSTRY** by James Harding

### Chronic shortage to oversupply

The imbalance between rising electricity output and slower industrial production will reduce scope for investmnent

confused economists and confounded investors this

In the past, electricity output grew at roughly half the rate of gross domestic product. But in the first nine months of this year, output rose by just 2 per cent while the sector, recorded 96 forthe economy grew an annual

rate of 7.2 per cent.
Nor do the power figures mmediately seem to tally in industrial production, which in China's manufacturing-heavy economy is almost all electricity-driven.

Sceptics say electricity generation is a more reliable measure than headline economy figures, which are more- show their frustration. prone to the kind of political nassage that ensures China's reaches its sensitive growth targets. For them, the divergence between the not invest "another dollar" economic numbers is puz-

"Every indicator sugge China's economy is growing much less quickly than 8 per cent [China's growth target for 1996). The statistics on one side must be wrong...and it is much easier to measure units of energy consumed than GDF growth," says one analyst in

Shanghai. The slowing electricity demand growth only undermines already waning foreign enthusiasm for investmment in China's power

Within a few years in the 1990s, China's electricity sector has switched from a situation of chronic shortage to general oversupply. At the same time, China wants to buy equipment to

develop its power industry overseas manufacturers. There is now an electricity overcapacity problem in China," consultants Cam-

bridge Energy Research

Associates said in a report

earlier this year, marking the dramatic shift in market conditions. "For half a decade, China has been the prime underserved market - and the stuff of dreams and aspirations for private power developers . . . [but] there is overcapacity in nearly every area where conditions would

at this time," the Cera report The rapid installation of new capacity - roughly 10 GW per year for the last 10 years - has been chiefly ted to play an active role in responsible for the apparent supply surplus in many areas of China

Huge regional differences exist in the development of upgrading project will be China's power sector. Inland provinces, such as Ganau, Qinghai, Henan and Sichuan still face serious electricity

China's power industry has areas now face serious particularly where internaexcess canacity.

Foreign investment has played an important part in the rapid development of China's power industry. By the end of last year, the State Power Corporation, the ministry-level body responsible for the administration of

total contracted foreign investment of \$23.7bn. Chiity at the end of 1997 was 254m KW. ground of a growing overca-

pacity problem and a soften- in 2009. But, betw investors have started to In September, AES Corpo-

ration, one of the largest foreign investors in China's power sector, said it would power statistics and the until the Chinese authorities resolve problems that have

> There is now an electricity overcapacity

problem in China'

the operations.

"Every month, someone tries to break a contract or get out of some sort of payment," said Bill Ruccius, president and chief executive of AES Orient, the north Asia division of the company that has invested \$380m in nine power projects with a total capacity of 3,000MW in

The changing conditions in the power market, as well as the shift in foreign towestor perceptions, have focused attention on different areas of the industry, such as distribution, hydropower and the future of nuclear energy.

The development of China's power grid promises strong growth in the next few years, but, again, the prospects for foreign investors may be mixed. China plans to invest about \$12bn to upgrade its urban power grids over the next three

But, in a signal that echaway from foreign suppliers, the State Power Corporation has said it plans to source the bulk of equipment from Chinese companies,

"The programme is expecpromoting the domestic industry, because almost all the equipment needed in the purchased at home," the official media has reported.

China is trying to funnel foreign investment into speshortages, while coastal cific areas of the industry. China

tional participation will for ter domestic technological Zhang Xuezhi, director, o

the hydropower develops department at the State Power Corporation said earlier this year that "massive hydropower projects are planned that will create eign-funded projects with a colossal demand for international loans, overseas technology and equipment and direct foreign investment"

The Three Gorges Dam will make a significant con-But against the back- tribution to China's hydropower output on completion ing of demand growth, and then, the project is likely to continue to be dogged by international human rights and environmental groups.

Their protests, which have focused on the forced relocation of more than im people the destruction of wildlife caused by the creation of a 600km-long lake and the environmental dangers of building such a huge man-made lake, have ebbed in recent years.

However, the controversy is likely to resurface as the project looks overseas for funds to help meet the estimated \$24.5bn cost of building the world's largest

hydropower station. The development of China's nuclear energy industry is also likely to raise concerns abroad and at home. But, in a country so overwhelmingly dependent on coal-fired power, which is already having a hugely

damaging impact on the environment and public health, an increase in nuclear electricity output has become an important target for the managers of China's power industry. China currently operates three nuclear power plants: two plants at the Daya Bay facility in Guangdong Province, and the Qinshan plant in Zhejiang province just

south of Shanghai, But Beijing has set targets for the accelerated development of the sector, by 2020, China is aiming to have 50,000MW of nuclear capacity, compared with the current 2.100MW. Growth in the nuclear sector, could represent between

\$1.5bn and \$2.5bn in conoes Beljing's other moves tracts to foreign equipment suppliers each year, industry analysts suggest. But, as is already the case elsewhere in the Chinese power industry, the competition will be stiff and margins slowly whittled down.

This year, after long negomachinery and electronics tiations to allay US fears over the onward export of nuclear technologies and the use of equipment in the military. President Clinton agreed to allow US companies to export civilian-use nuclear energy equipment to

**UNEMPLOYMENT** by James Kynge and James Harding

### Solving the queue problem

The jobless ranks have reached the highest level since 1949 and could top 18m by next year
